

Thirty-Fourth Biennial Report

of the

DEPARTMENT OF WATER RESOURCES

TO

HONORABLE FRANK B. MORRISON

Governor of The State of Nebraska

LINCOLN, NEBRASKA

1961-1962

State of Nebraska

LINCOLN 9

IN REPLY REFER TO

November 30, 1962

The Honorable Frank B. Morrison
Governor of Nebraska
Lincoln, Nebraska

Dear Governor Morrison:

I have the honor to transmit to you herewith the Thirty-Fourth Biennial Report of the Department of Water Resources.

This report covers the activities of this department during the 1961 and 1962 water years, the two-year period which ended on September 30, 1962. More specifically, the report contains a list of the water appropriations, a list of the public districts organized under Chapter 70, Article 6, and a list of the reclamation districts organized under Chapter 46, Article 5, Reissue Revised Statutes, 1943, as they were of record on September 30, 1962.

Respectfully submitted,

DEPARTMENT OF WATER RESOURCES

Dan S. Jones, Jr.
Dan S. Jones, Jr., Director

Thirty-Fourth Biennial Report

of the

DEPARTMENT OF WATER RESOURCES

TO

HONORABLE FRANK B. MORRISON

Governor of The State of Nebraska

LINCOLN, NEBRASKA

1961-1962

**EXECUTIVES AND EMPLOYEES
OF THE
DEPARTMENT OF WATER RESOURCES**

Dan S. Jones, Jr., Director of Water Resources	Lincoln
Marion E. Ball, Assistant Director	Lincoln
F. H. Klietsch, Division Engineer	Bridgeport
Edwin S. Kimmel, Hydraulic Engineer	Bridgeport
Mary L. Kobza, Special Assistant	Lincoln
Robert S. Bishop, Senior Hydrographer—Administrative	Ord
Leo F. Zabel, Senior Hydrographer—Administrative	Cambridge
Stan M. Christensen, Senior Hydrographer—Office	Bridgeport
Chris D. Christensen, Associate Hydrographer	Bridgeport
John H. Hintz, Associate Hydrographer	Hershey
David J. Neely, Associate Hydrographer	Bridgeport
John G. Lathrop, Junior Hydrographer	Chadron
Lloyd E. Powell, Jr., Junior Hydrographer	Bridgeport
Marvin D. Stevens, Junior Hydrographer	Bridgeport
Janis Stakens, Draftsman	Lincoln
Mollie Bauer, Bookkeeper	Lincoln
Mary C. Kildaw, Steno Clerk III	Lincoln
Sandra Wedding, Steno Clerk II	Lincoln
Sharon Lou Egbers, Steno Clerk I	Lincoln
Dorothy Brening, Typist Clerk II	Bridgeport
June Nelson Typist Clerk II	Lincoln
Anna E. Griffin, Caretaker	Bridgeport

WATER COMMISSIONERS

Henry F. Brandt, Republican River Basin	Cambridge
Morris H. Brown, Republican River Basin	Culbertson
John Cicmanec, Loup River Basin	Ord
Philip Flohr, Loup River Basin	Kimball
Eldon G. Gilchrist, Lodgepole Creek Basin	Bridgeport
Robert W. Hoover, North Platte River Basin	Ogallala
Herschel A. Norris, North Platte River Basin	Brady
Dorrance H. Schmidt, North Platte River Basin	Bridgeport
James A. Stevens, Loup River Basin	Ord
David Pokraka, Loup River Basin	North Loup

OTHERS EMPLOYED DURING BIENNIUM

Kathryn I. Ward, Special Assistant	Lincoln
Nelda Jean Hall, Steno Clerk III	Lincoln
Judith Velloff, Steno Clerk II	Lincoln
Alta L. Hoback, Typist Clerk I	Lincoln
Janice Stevens, Typist Clerk I	Bridgeport

WATER SUPPLY

During this biennium the 1961 and 1962 irrigation seasons were of wide variation. The 1961 water supply was one of the lowest on record while the 1962 supply was very good. During July and August when the demand for water for crops is the greatest, both rainfall and available storage were below normal in 1961 and above normal in 1962.

The runoff of the North Platte River above Pathfinder Dam was 634,200 acre-feet during the 1961 water year and 1,513,500 acre-feet during the 1962 water year, or 51 percent and 121 percent, respectively, of the 50 year average, 1904-1953 (1,253,000 acre-feet). These figures show a large deficiency of natural flow above Pathfinder and it was likewise deficient between Pathfinder and the Tri-State Dam for the 1961 water year, however it was much improved during the 1962 water year. The United States Supreme Court Decree does not require any natural flow to pass the Tri-State Dam. All canals diverting below Tri-State Dam depend upon surface runoff and return flow developing in Nebraska. While natural flow was well below normal during 1961 in the section above the Tri-State Dam, an adequate supply of storage water was available to produce good crops. As previously stated, the 1962 water supply was more than ample, as indicated by Pathfinder storage carryover of 498,050 acre-feet on September 30, 1962. The September 30, 1961 Pathfinder storage carryover was 39,040 acre-feet.

The discharge of the North Platte River below the Tri-State Dam for the water year 1961 was 105,210 acre-feet and for the water year 1962 was 153,820 acre-feet. The mean annual discharge at the Tri-State Dam for the period 1939-1953 was 280,300 acre-feet. The decline in water passing the Tri-State Dam is to a large extent due to the reduction in power production at Guernsey during the non-irrigation season and abandonment of the Lingle power plant. The Guernsey plant is now operated only when water is being released for irrigation or when all storage appropriations above Guernsey Dam have been satisfied and flood water is being released. Since this reduced flow occurs during the non-irrigation season it does not adversely affect the irrigated crops, however it does reduce the amount of water available for storing in the Kingsley Reservoir.

The amount of the annual flow in the river at Lewellen, at the upper end of Kingsley Reservoir, has a material effect upon the amount of storage in the reservoir and, during the irrigation season, upon the amount of natural flow available for diversions from the North Platte and Platte Rivers as far east as Kearney. The ten-year (1942-1951) mean annual flow at Lewellen in the North Platte River was 1,126,360 acre-feet. During the water year 1961 this flow was 625,500 acre-feet and during 1962 it was 871,200 acre-feet,

55% and 77% of the mean, respectively. These figures reflect a much improved water supply during the 1962 water year.

Analyzing the situation with regard to the natural flow supply for direct flow irrigation diversions, the flow at our gaging stations on the North Platte River at Bridgeport and Lewellen during the months of July and August will show whether the water supply is good or bad. These two stations, which have little if any storage water passing them, are used as key stations in determining the priority distribution of the available natural flow. If the flows are normal at the two stations, they will usually be normal farther east, on the North Platte and Platte Rivers as far as Cozad where major diversions end.

During the ten-year period, 1942-1951, the mean flow during July and August was 127,680 acre-feet at Bridgeport and it was 137,340 acre-feet at Lewellen. During the same period in 1961 the flow at Bridgeport was 29,020 acre-feet and at Lewellen it was 30,280. During the same period in 1962 these flows at Bridgeport were 121,610 acre-feet and at Lewellen they were 143,620 acre-feet. Percentagewise, considering the 1962-1951 mean as normal, during the period for 1961 the flow at Bridgeport was 23% of normal and at Lewellen 22% of normal, and for 1962 it was 96 and 104 percent, respectively. These figures show that during 1961 the available water for irrigation was extremely low and comparable to the two previous dry years 1959 and 1960. They also show that 1962 was a good water year, normal or above, and quite a contrast to the previous three dry years.

During the ten-year period, 1942-1951, the mean annual flow of the South Platte River at North Platte, at its confluence with the North Platte River, was 286,990 acre-feet. During the water year 1961 the discharge at this location was 214,400 acre-feet and in 1962 it was 221,200 acre-feet, 75 and 78 percent respectively of the ten-year mean. These flows do not indicate whether the supply was good or bad since the Platte Valley Public Power and Irrigation District diverts all available water at Paxton about 45 miles upstream. However, it does indicate that the accrual within the 45 mile reach is fairly consistent and dependable.

That section of the Niobrara River from the Nebraska-Wyoming State Line east about 60 miles to the Mirage Flats District diversion, near Old Dunlap, is the only section of the entire river that is over appropriated with regard to water used for irrigation. The annual inflow to the Box Butte Reservoir indicates the normalcy of the supply. The ten-year mean inflow for the period 1949-1958 was 23,600 acre-feet which may be considered as normal. During the water year 1961 the inflow was 18,960 acre-feet and for 1962 it was 24,210 acre-feet, or 81 and 102 percent of normal, respectively.

RESERVOIRS

The Pathfinder Reservoir, located on the North Platte River in Wyoming about 40 miles southwest of Casper, stores water for use on lands situated on both sides of the river in southeastern Wyoming and in the Panhandle area of Nebraska, generally referred to as the North Platte Project and Warren Act Contractors' land. It has a capacity of 1,016,000 acre-feet. The Guernsey Reservoir is also located in Wyoming on the North Platte River downstream from Pathfinder and about 50 miles northwest of the point where the North Platte crosses the Nebraska-Wyoming State Line. It has a capacity of 44,800 acre-feet which, in addition to Pathfinder capacity, is available to the same users. Guernsey for the most part is operated as a regulator for Pathfinder storage water enroute to project lands and to Warren Act Contractors. It also serves as a power head for the operation of a hydroelectric plant at the reservoir. Lakes Alice and Minatare are inland reservoirs located in Nebraska about eight miles north of Minatare and provide an additional annual storage of 68,000 acre-feet. This makes a total storage capacity of 1,128,800 available to Pathfinder storage users. The four reservoirs are owned and operated by the United States Bureau of Reclamation. During the 1961 water year about 491,000 acre-feet of storage water were diverted to the land, and about 465,700 acre-feet were diverted in 1962.

The Glendo Reservoir is located on the North Platte River in Wyoming between Pathfinder and Guernsey Reservoirs, about 4.5 miles southwest of the town of Glendo. It has a capacity of 800,000 acre-feet, with 734,630 acre-feet being active storage, 12,060 acre-feet dead and 53,310 acre-feet inactive storage or a total of 65,370 acre-feet as a minimum head necessary for operating the power plant. Of the active storage space, 100,000 acre-feet are for Glendo Project irrigation, 275,000 acre-feet for flood control and 359,630 acre-feet for irrigation restorage and sediment control. In addition, a surcharge capacity of 288,000 acre-feet is available.

Water was first stored in the Glendo Reservoir on October 18, 1957. The project dead storage of 12,060 acre-feet can be used temporarily for Glendo Project irrigation when the need arises by replacing it with other storage water temporarily stored in Glendo Reservoir. Temporary storage in Glendo may consist in part of Pathfinder, Kendrick, Guernsey, Lake Alice and Lake Minatare storage. This arrangement enhances the firm power output from the various hydroelectric plants located on the river from Seminole to Guernsey Reservoirs. Kendrick storage is handled on an exchange basis between Seminole and Pathfinder Reservoirs so that it can be used for irrigation on the Kendrick Project.

The amount of Glendo Project storage water diverted to the land in 1961 was 10,850 acre-feet and in 1962 it was 4,460 acre-feet. This storage is available to canals diverting from the North Platte

River for lands located in eastern Wyoming and the Panhandle area in Nebraska which do not have storage available to them from some other source. Glendo Project is limited to storing 40,000 acre-feet per year for irrigation, plus evaporation, and can accumulate carry-over plus the yearly allowance to the extent of 100,000 acre-feet. The storage is allocated for use annually, 25,000 acre-feet to Nebraska and 15,000 acre-feet to Wyoming.

The Central Nebraska Public Power and Irrigation District owns and operates Kingsley Reservoir, officially known as Lake C. W. McConaughy, located on the North Platte River about seven miles north of Ogallala. It has a capacity of 2,000,000 acre-feet, all of which is available for irrigation. The inflow to the reservoir during the water year 1961 was 700,290 acre-feet of which 352,720 acre-feet were intercepted and stored. Approximately 381,000 acre-feet of storage were withdrawn through the dam during the 1961 season. During the same year the reservoir gained 44,750 acre-feet and loss due to evaporation was 76,800 acre-feet. The inflow during the 1962 water year was 946,590 acre-feet, of which 660,220 acre-feet were intercepted and stored. Approximately 136,830 acre-feet of storage were withdrawn through the dam during the 1962 season. During the same year the reservoir lost 34,700 acre-feet and loss due to evaporation was 89,100 acre-feet.

The Sutherland Reservoir is an off-channel reservoir located about three miles south of Sutherland, Nebraska. It is owned and operated by the Platte Valley Public Power and Irrigation District. It was originally constructed to serve as a storage reservoir and obtained its water from the North Platte River near Keystone, Nebraska. However, because of a seepage problem, a large part of its appropriation has been transferred to Kingsley Reservoir. It now serves primarily as a regulator, having a limited capacity of about 85,000 acre-feet. Since it serves as a regulator its contents fluctuate a great deal during the year. Therefore, no analysis of its operation is made.

Harry Strunk Lake is a reservoir located on Medicine Creek which impounds natural flow accruing in the Medicine Creek Basin above the dam located about eight miles northwest of Cambridge. It is owned and operated by the United States Bureau of Reclamation and was complete in 1949. It has a capacity of 39,230 acre-feet at the top of the irrigation pool and 90,920 acre-feet at the top of the flood control pool.

The Harlan County Reservoir is located immediately south of Alma on the Republican River. It is owned and operated by the United States Corps of Engineers and was completed in 1952. It provides storage water for irrigating lands in Nebraska and Kansas and has a capacity of 850,000 acre-feet, of which 500,000 acre-feet are for flood control. The capacity at the top of the irrigation pool is 350,000 acre-feet of which 150,340 acre-feet are for irrigation.

Swanson Lake is a reservoir located on the Republican River about three miles west of Trenton and was completed in 1953. It is owned and operated by the United States Bureau of Reclamation and has a capacity of 254,000 acre-feet of which 120,160 acre-feet are for irrigation and 133,840 acre-feet for flood control.

The Enders Reservoir is located on the Frenchman River about eight miles southeast of Imperial and is owned and operated by the United States Bureau of Reclamation. It has a capacity of 74,520 acre-feet of which 44,480 acre-feet are for irrigation and 30,040 acre-feet are for flood control. It was completed in 1950.

The Box Butte Reservoir is located on the Niobrara River about nine miles north of Hemingford. It was constructed by the United States Bureau of Reclamation to provide water for the Mirage Flats Project, also constructed by the Bureau, the reservoir was completed in 1946 and the irrigation project in 1947. The reservoir and irrigation system is operated and maintained by the Mirage Flats Irrigation District. The reservoir has a capacity of 31,075 acre-feet, all of which is available for irrigation. During the 1961 irrigation season 15,440 acre-feet of storage water were diverted to the land irrigated and during the 1962 season 12,790 acre-feet of storage water were diverted.

The Oliver Reservoir is located on Lodgepole Creek about eight miles west of Kimball and is owned and operated by the Kimball Irrigation District. It originally had a capacity of 7,500 acre-feet, but through many years of use it has silted in and its capacity is now estimated to be about 5,600 acre-feet, all of which is available for irrigation. All tabulations in our records are still recorded on the basis of the original capacity of 7,500 acre-feet, since no sedimentation survey has been made. During the 1961 irrigation season 4,500 acre-feet of storage water were diverted to the District's land and 3,600 acre-feet of storage water were diverted in 1962.

The Bennett Reservoir is located on Lodgepole Creek about three miles northeast of Kimball. It is owned and operated by an individual and has a capacity of about 1,400 acre-feet, all of which is available for irrigation. During the 1961 irrigation season about 1,300 acre-feet of storage water were diverted to the land, and in 1962 about 980 acre-feet of storage water were diverted.

The Whitney Reservoir is an off-stream reservoir located about three miles west of Whitney and water is diverted into it from the White River through a wooden pipe line about eight miles long. It is owned and operated by the Whitney Irrigation District and has a capacity of 10,000 acre-feet, all of which is available for irrigation. During the 1961 irrigation season about 7,800 acre-feet of storage water were diverted to the land and in 1962 about 5,040 acre-feet were diverted.

Crescent Lake is a natural lake located in the Sand Hill region about 25 miles north of Oshkosh near the head waters of Blue Creek. The water in Crescent Lake, on a limited basis, is used to supplement the natural flow of canals diverting from Blue Creek. The maximum amount of water that can be taken from the lake is limited by the concrete floor in the outlet headgate. About 400 acre-feet of lake water were diverted into the canals during the 1961 season and about 300 acre-feet were diverted during the 1962 season.

COMPARISON OF STORAGE IN RESERVOIRS

Name of Reservoir	Capacity top of Irrig. Pool Acre-feet	Maximum Storage				Carry Over Storage			
		1961		1962		Sept. 30, 1961		Sept. 30, 1962	
		Ac.Ft.	% Avg.	Ac.Ft.	% Avg.	Ac.Ft.	% Avg.	Ac.Ft.	% Avg.
Pathfinder	a 1,016,000	485,300	58	1,016,000	122	34,800	11	471,620	147
¹ Glendo	b 165,370	31,100	62	130,070	259	16,910	51	111,800	336
Lake C. W. McConaughy	c 2,000,000	1,474,400	108	1,667,200	122	1,080,400	99	1,539,400	140
Oliver	c 7,500	5,980	126	4,750	100	1,200	83	1,450	98
Bennett	d 1,400	1,330	121	1,070	98	600	123	700	144
Whitney	c 10,000	9,480	103	10,340	112	1,660	37	5,300	115
Crescent Lake	d 7,000	1,290	24	1,400	27	220	8	570	21
Box Butte	e 31,075	20,790	78	22,870	86	3,710	36	8,910	89
² Enders	f 44,480	45,860	102	45,720	101	21,390	64	21,920	66
² Harry Strunk Lake	f 39,230	42,640	99	51,500	119	24,970	91	37,990	137
² Swanson Lake	g 120,160	125,800	112	148,800	133	79,680	118	105,220	156
² Harlan County	h 350,120	428,400	149	411,700	144	297,700	130	313,270	138

¹ Prior to 1962 storage used for irrigation consisted of dead and power head water in Glendo which was replaced temporarily with other water stored in Glendo. Dead and power head water of 65,370 a.f. was satisfied during 1962 for the first time and for the first time had irrigation water carryover. The above analysis includes irrigation, dead and power head water.

² When maximum storage exceeds capacity of irrigation pool, it indicates water is being held in flood control pool.

g 1954-1960 record used for averages.

h 1953-1960 record used for averages.

WATER ADMINISTRATION

The North Platte River above the Tri-State Dam is administered separately and without regard to any rights in the Platte River Basin below the Tri-State Dam. The Tri-State Dam is the diversion dam on the North Platte River for the Farmers Irrigation District, served by the Tri-State Canal. It is located about one mile east of the Wyoming-Nebraska State Line.

This method of administration has been in effect since October, 1945, when the U. S. Supreme Court handed down the decree allocating the natural flow of the North Platte River Basin from its headwaters in Colorado, through Wyoming, downstream to the Tri-State Dam. The decree did not deal with the administration of storage water nor did it require any natural flow to pass the Tri-State Dam. Therefore, no appropriators below the Tri-State Dam have a claim on natural flow developing above the dam, regardless of their priority. This section is administered on a joint basis, with the U. S. Bureau of Reclamation being fully responsible for the allocation of storage water, and Wyoming and Nebraska being fully responsible for the distribution of the available water, both storage and natural flow, to their respective canals according to their State laws, with all other features of administration being worked out cooperatively between the three parties.

In the section of the river between Guernsey Dam, Wyoming, and the Tri-State Dam, eight canals divert water for use on Nebraska lands. The Gering-Fort Laramie, Interstate and Northport Canals are government constructed projects. The other canals, Gering, Mitchell, Tri-State, Ramshorn and French, were all constructed by private groups. Ramshorn Canal diversions of water arising in Wyoming are limited to 14 second-feet by the decree. The Gering-Fort Laramie, Interstate and French Canals are used to irrigate lands in both Wyoming and Nebraska, while the others are used to irrigate only lands in Nebraska. All, except the Mitchell, Ramshorn and French Canals, have storage rights in the Pathfinder Reservoir in addition to natural flow rights.

The Glendo Reservoir was completed in the fall of 1957 and since that time the Mitchell Canal has received its storage needs from that source. Glendo storage is also available to canals in Wyoming and Nebraska from Guernsey Dam to Lewellen that do not have other storage rights. Because of the availability of storage and the U. S. Supreme Court Decree handed down in 1945, the Department rarely experiences serious difficulty in administering the water above the Tri-State Dam.

In connection with the Department's administration, it should be pointed out that since the construction, in 1941, of reservoirs and additional hydro-electric plants between Lewellen and Kearney the problem of administering natural flow from the Platte River has

been materially reduced. The usual priority date down to which canals were closed, prior to these developments was June 1, 1884, for short periods and for longer periods down to January 1, 1890, while at this time west of Sutherland it is February 2, 1894 and east of Sutherland to Cozad it is June 14, 1894, and from Cozad east it is September 16, 1929.

The time of closing canals and the duration varies from year to year, depending upon the natural flow supply, amount of rainfall and other climatic conditions, with the critical period being during July and August. However, many of the natural flow closing orders do not now adversely affect crop production. Since 1941 many of the appropriators affected have storage or groundwater available to supplement their natural flow deficiency. Because all streams in the Platte River Basin from the Wyoming-Nebraska and the Colorado-Nebraska State lines east to Kearney are over-appropriated some canals are closed each year unless rainfall is well above normal during the months of July and August, a condition which rarely occurs.

During the 1961 irrigation season the first closing orders were effective June 24 in the Platte River Basin between Nebraska-Wyoming and Nebraska-Colorado State lines to Kearney and were opened and closed as follows:

- On June 24 canals were closed antedating November 24, 1894
- On June 26 canals were closed antedating April 12, 1894
- On July 2 canals were closed antedating September 6, 1893
- On July 5 canals were closed antedating February 20, 1893
- On July 9 canals were opened to April 12, 1894
- On July 12 canals were opened to June 9, 1894
- On July 13 canals were closed antedating February 12, 1894

On July 13 the situation was as follows:

Appropriations from Kearney to Cozad were closed down to September 17, 1929.

Appropriations from Cozad to Sutherland on North Platte and Platte Rivers, and those on South Platte to Nebraska-Colorado State line were closed down to January 23, 1894.

Appropriations west of Sutherland on the North Platte River were closed down to February 12, 1894.

On July 31 canals west of Sutherland were opened to September 22, 1894.

On August 1 canals west of Lewellen were opened October 6, 1894.

On August 9 canals west of Lewellen were closed to April 12, 1894.

On August 31 all canals were opened to April 12, 1894.

On September 14 all remaining closed appropriations were opened.

The foregoing in general represents the pattern of opening and closing appropriations in the Platte River basin from Kearney west to the State lines during the 1961 irrigation season. However, there were a number of variations and they are not strictly applicable to all individual canals and are only intended to give a general idea of the administrative problems involved.

The 1961 water year was an abnormally dry one compared with 1959 and 1960 and created numerous administrative problems. The season of 1962 was near to ideal with regard to our administrative responsibilities. It was necessary in 1962 to close a few canals for short periods, but such closures were well below those required during a normal year and our administrative problems were of no particular consequence. However, the 1962 season weatherwise caused the farmers in the Panhandle considerable crop damage. The Spring up to May 15 was extremely dry which reduced seed germination and when heavy rains came after May 15 the stands were further reduced and damaged by too much rain. Then an unusually heavy frost in early September damaged irrigated crops further so that, while rain and irrigation water was plentiful the unusual weather conditions caused below normal crop production. Therefore, total crop production was much better during the unusually dry season of 1961 than it was during the normal rainfall season of 1962 in the Panhandle area. However, during this same year the State as a whole had a near record year with regard to crop production.

While Lodgepole Creek is a tributary stream located in the Platte River basin it must be administered separately from all others because of the South Platte River Compact between Nebraska and Colorado. Lodgepole Creek crosses the Colorado-Nebraska State Line before it reaches the South Platte and the Compact gives Nebraska full use of all the water in the creek to a division point about two miles above the State Line. Colorado has full use of all water flowing at or below the division point. Therefore, if Nebraska attempted to run water from Lodgepole Creek into the South Platte to serve Nebraska farmers on a priority basis it would be used by Colorado before it reached Nebraska users.

During dry periods Lodgepole Creek water in Nebraska is likewise administered separately in four sections, as follows: Wyoming-Nebraska State Line to Dix, Potter to Brownson, from above seven miles west of Sidney to the west edge of Sidney and from the east edge of Sidney to the Compact division point. This is for the reason that any minor flow in the Creek requiring priority distribution goes underground before it will reappear in the stream at the upper end of each of the three sections involved. When there

is enough flood water to flow from one section to the other there is enough water for all diversions and no distribution on a priority basis is required. The Department has tried on several occasions to get water from one section to another by closing canals. However, it has been unable to do this, so rather than waste the water in attempting to do this the sections are administered separately.

In the upper section from the State Line to Dix, canals with priorities of April 15, 1899, or older get some natural flow during dry years, such as 1961. The Oliver Reservoir located eight miles west of Kimball, owned and operated by the Kimball Irrigation District, was full at the beginning of both of the 1961 and 1962 seasons, which provided an adequate supply of supplemental water to produce good crops in the District.

In the two intermediate short sections very little water is available, and for the most part it is used by the oldest right in the respective sections.

In the lower section, east of Sidney, during 1961 the Creek would have been practically dry if it were not for two or three small springs and two or three places where city water supplies from wells were used for sewage disposal plants and wasted into the creek. The Department distributes this water to the oldest right in between the several places where the spring and waste water is discharged, since by tests we have determined that during a dry year the water will not travel downstream from one place of discharge to the other when junior intermediate canals are closed.

Strict administration is required on the Niobrara River from the Wyoming-Nebraska State Line to the diversion of the Mirage Flats Irrigation District located near Old Dunlap. The direct flow appropriation of the Mirage Flats Irrigation District permits a maximum rate of diversion of 158 second-feet with a priority of July 25, 1937. This far exceeds the summer flow in the river. Hence, it is necessary each year to close appropriations with priorities junior to July 25, 1937, in this river section when the District begins to divert water. During dry years there is insufficient water above the District's diversion to take care of the needs of all the seniors to the District. Because of good cooperation among these seniors it is rarely necessary for the Department to close any of them in favor of others because of their priority status. All of the canals have recorders and it is necessary for the Department to make frequent measurements and adjustments so they can stay within their permitted rates of diversion. However, because of the location of the diversions and the cooperation among the appropriators usually it is unnecessary to close any of the canals senior to July 25, 1937.

Moisture conditions in the Republican River Basin continued their favorable trend during 1961 and 1962. No major administrative

problems arose. Storage water was available to junior appropriators of major streams from the federal reservoirs constructed to serve lands in the Frenchman-Cambridge and the Bostwick Divisions of the Missouri Basin Project. However, during the 1962 water year the natural flow supply was so plentiful that very little storage water was used except on the federal projects. The costs for salaries and expenses of water commissioners in the basin were at a minimum level.

The water supplies in the Loup River Basin during the biennium were exceptionally good also. This is borne out by the production of hydroelectric power at the plants of the Loup River Public Power District which ranked near the record high for both years.

Litigation between the Loup River Public Power District and various upstream irrigators continued. In October 1960 the Federal District Court held that it had no jurisdiction in the Loup case which had been before it since May, 1955. In 1961 the department denied the petition filed in September, 1958 by Max D. Hickman to cancel the water appropriation of the Power District for the reason that the project was not completed and the water applied to beneficial use on or before August 24, 1937, the time limited in the permit granted by the department. The North Loup River Public Power and Irrigation District and the Middle Loup Public Power and Irrigation District filed petitions of intervention which the department also denied. Upon the appeal of the case to the Supreme Court, the court reversed the department and remanded the case for trial.

Evidence was taken in a three-day hearing in July, 1962 before the Department and in December, 1962, before this report finally went to press, the Department ruled that the amount of the power appropriation under Application 2287 with priority date of September 5, 1932, should be limited to 506 second-feet, the amount used prior to August 24, 1937, instead of 3,500 second-feet, the amount of the provisional grant. A petition for a rehearing is pending before the Department.

HYDROGRAPHY

The cooperative stream gaging program in which the Department of Water Resources and the Surface Water Branch of the U. S. Geological Survey have participated on a fifty-fifty basis for many years was continued with each participant expending approximately \$67,200 during each of the years of this biennium. As of October 1, 1962, there were 80 gaging stations maintained on the principal streams of the State under this program.

In addition to the gaging stations which are operated under the above cooperative program, seventy-three other stations were operated by the U. S. Geological Survey in cooperation with other

agencies of the Department of the Interior, the Corps of Engineers, Mid-State Reclamation District and the Department of Agriculture. Nebraska Department of Water Resources personnel make stream measurements and assist with computations of daily discharge records on many of the gaging stations whose construction was financed by other agencies.

The ten hydrographers and other personnel of this department, in addition to making the necessary measurements to support the State's share of cooperative stream gaging program, are responsible for measuring the numerous canal and pump diversions from the natural streams and servicing the 117 recording gages on canals when they are in operation.

IRRIGATION WELLS

The activity associated with the registration of irrigation wells, which is a responsibility assigned to the Department by the 1957 Legislature, was considerably less than in the preceding biennium. There were 1,053 wells registered during the biennium ending on September 30, 1962, while in the two preceding years there were 6,299 wells registered. During the past two years there were 17 registered irrigation wells abandoned according to reports submitted to the Department. At the end of the biennium there were 24,303 registered irrigation wells on record.

The 1961 Legislature amended the well registration law to provide that the owner of an abandoned irrigation well shall report the same to this Department and that such owner shall properly plug or cap such abandoned well. A further amendment provides that any irrigation well drilled to replace an abandoned registered irrigation well shall be registered in the same manner as the original well, but there shall be no fee required for registering such replacement well.

Elsewhere in this text, with a statistical summary, is a tabulation showing the number of registered wells by counties on September 30, 1962. There are 99 municipal and industrial wells included in the list, the same having been registered at the request of the owners although their registration is not required by statute.

DAMS

The 1961 Legislature amended Section 46-257 R. R. S., 1943, which provides for the approval by the Department of plans of proposed dams to be constructed in the state. As now amended, this section provides that any person intending to construct a dam across any natural stream or for reservoir purposes shall submit detailed engineering plans of the same to the Department for approval before construction may start, except for certain dams which are exempt or for which plans may be submitted in another manner. For

any dam to be constructed across an ordinarily dry watercourse for flood control, erosion control or water for livestock which dam will be no more than 30 feet high and which will have an impounding capacity of not more than 50 acre-feet of water, including permanent storage capacity of not more than 25 acre-feet, the owner thereof shall file, in duplicate on forms furnished by the Department, a simple description of the dam with a drawing showing the proposed location and construction shall not proceed until the plan is approved by the Department.

In addition to the foregoing, any dam to be constructed across and ordinarily dry watercourse for livestock purposes, for erosion control or for recreational purposes, whose impounding capacity will be not more than 15 acre-feet may be constructed without the filing of plans and without the approval of the Department.

The 1961 amendments of Section 46-257, which make the requirements of the section less restrictive than before, were recommended by the Department for the reason that it was thought that better compliance with the law would be realized if detailed plans were not required for the smaller dams which previously were not exempt. However, it is doubtful if the objective is being accomplished since only forty dam descriptions were processed in the first year that the law was effective.

INTERSTATE COMPACTS

The members of the Niobrara River Compact Commission were successful in negotiating two interstate compacts with respect to the waters of the Niobrara River Basin.

In January, 1961, the compact commissioners for South Dakota, Nebraska and the United States signed the Lower Niobrara River and Ponca Creek Compact. This compact apportions between South Dakota and Nebraska the waters of Minnechaduzza Creek and the Keya Paha River, both tributaries of the Niobrara River, and the waters of the Ponca Creek, a tributary of the Missouri River. One of the basic provisions of the compact is the recognition of appropriations in each state by the other state. The water administrators of the two states are charged with the administration of the compact.

The 1961 Legislatures of South Dakota and Nebraska ratified the compact and in 1961 a bill for its approval was introduced in the United States Senate. However, action on the bill was deferred pending compact negotiations with Wyoming with respect to the waters of the Upper Niobrara River.

Although negotiations with Wyoming were carried on concurrently with those between South Dakota and Nebraska, it was not until October 26, 1962 that they were completed and a compact

signed. The Upper Niobrara River Compact apportions the waters of the main stem of the river between the two States primarily on a priority basis with certain limitations being placed on impounding capacities of storage reservoirs which may be constructed in Wyoming. It also provides that the two States, in cooperation with the U. S. Geological Survey, will conduct ground water studies within the basin in the state line area, and that the compact may be amended for the purpose of apportioning the ground water when the commissioners find that sufficient data has been assembled.

Bills providing for the ratification of the Upper Niobrara River Compact will be introduced in the 1963 Sessions of the Wyoming and Nebraska Legislatures, and, following favorable action there, approving legislation will be sought in the U. S. Congress.

The initial meeting of the Big Blue River Compact Commission was held in July, 1961. Brigadier General W. R. Shuler, Division Engineer, Missouri River Division Corps of Engineers, the Federal representative was designated chairman of the commission. Mr. Arno Windscheffel, Chairman, Kansas Water Resources Board, and Dan S. Jones, Jr, were the commissioners for Kansas and Nebraska respectively. The Commission appointed an engineering committee, each representing a member of the commission, to assemble and process engineering and other data necessary in the developing of a basis for the apportionment of water between the two States. Mr. M. E. Ball, Assistant Director, Department of Water Resources, is the Nebraska member of the engineering committee.

The original assignment of the engineering committee is nearly completed and, in addition, the building of an electric model for use in analyzing the effect of ground water pumping on stream flow in the basin is scheduled for March, 1963.

The current representative of the United States is Brigadier General Robert F. Seedlock, Division Engineer, Missouri River Division, Corps of Engineers, and the commissioner for Kansas is Mr. Dwight Metzler, Executive Secretary, Kansas Water Resources Board. The objective of the commission is to complete the negotiations in time for ratifying legislation to be considered by the 1965 Sessions of the legislatures and the Congress.

The Republican River Compact Administration has held its regular annual meetings during the biennium. It was not necessary to allocate water among the States under the terms of the compact.

NEW DEVELOPMENT

Good progress was made in the development and control of the State's water resources by local, State and Federal agencies. Following is a brief summary of accomplishments by major river basins.

Republican River Basin

The Culbertson Canal Extension, a part of the Frenchman-Cambridge Division, was completed in 1961 by the Bureau of Reclamation, making water service available to an additional 11,500 acres of land, of which 7,500 acres were reported to have been irrigated in 1962. The total acreage in the Frenchman-Cambridge Division for which water service was available in 1962 amounted to 60,140 acres, of which 47,700 was being irrigated. The Red Willow storage dam on Red Willow Creek was completed in 1962 and dedicated on August 4, 1962. Approximately 22,000 acre-feet of storage water had accumulated in the 38,000 acre-foot irrigation pool on September 30. Good progress was being made on the Red Willow Canal and Diversion Dam which will provide irrigation service for 4,150 acres of land along Red Willow Creek and the north side of the Republican River. It is anticipated that construction on this unit will be completed in 1963 when the entire 64,300 acres for which service is now planned in the Frenchman-Cambridge Division will have service available.

Expansion of irrigation continued within the Nebraska portion of the Bostwick Division, constructed by the U. S. Bureau of Reclamation, and during 1962 there were 19,950 acres irrigated out of the 24,200 acres for which service is available.

Loup River Basin

The Sargent Unit of the Middle Loup Division, Missouri Basin Project, has been in operation since 1957. The acreage irrigated increased from about 8,000 acres in 1960 to nearly all of the planned acreage of 13,700 acres in 1962. Late in 1962 an agreement was made between the Loup River Public Power District, the U. S. Bureau of Reclamation and the Loup Basin Reclamation District whereby the Power District is compensated for power interference by the delivery of power to the district from the Federal hydroelectric plants on the Missouri River. An action begun in the Federal District Court in 1958 to condemn a portion of the power appropriation was dismissed when the agreement was reached.

The Sherman Dam and Reservoir, together with the Arcadia Diversion Dam and the Sherman Feeder Canal, key features of the Farwell Unit of the Middle Loup Division, were completed in the summer of 1962. Diversions from the Middle Loup River of up to 125 second-feet for the purpose of priming and seasoning the canal were made by the Bureau of Reclamation in November 1962. Good progress was made in the construction of the canal and distribution system for the 52,000 acres in the Farwell Unit and it is anticipated that water service will be available for a few thousand acres in 1963.

As in the case of the Sargent Unit, the Loup River Public Power District entered into an agreement with the Bureau of Reclamation

and the Loup Basin Reclamation District whereby interference with power generation by use of water on the Farwell project will be compensated for with power from the Missouri River power plants.

The Bureau of Reclamations feasibility report on the North Loup Division, which was cleared by the States in 1961, was released by the Bureau of the Budget late in the 1962 Congressional Session. However, no action was taken by congressional committees on legislation to reauthorize the construction of the 52,000 acre proposed project.

A feasibility study on a proposed irrigation project of some 30,000 acres in the Cedar River Valley, known as the Cedar Rapids Division, was carried on by the Bureau of Reclamation and the release of the report at an early date is anticipated. A reconnaissance type study on a proposed dam and reservoir on the Loup River in the vicinity of Fullerton, Nebraska, made by the Bureau of Reclamation with the aid of the Corps of Engineers and State and local interests, was completed in June, 1962 and submitted to the Secretary of the Interior. At the time of this report the results of the Fullerton study had not been made public.

Platte River Basin

Legislation authorizing the Nebraska Mid-State Reclamation District project as a unit of the Missouri Basin Project was passed by the U. S. Senate in 1961. However, no action was taken on the measure in the House of Representatives during either session of the 87th Congress, so it will be necessary to introduce new bills in both houses if this development is to be accomplished as a federal project.

During the current biennium the Metropolitan Utilities District of Omaha filed an application for permit to divert water from the Platte River for municipal use in Omaha through a proposed municipal well field located along the river a few miles upstream from Plattsmouth. The City of Fremont filed for a similar permit in connection with existing municipal wells now used there. The City of Grand Island likewise filed for an appropriation from the Platte River through a well field the city intends to develop on an island between two channels of the river. The City of Lincoln in 1948 filed an application for the Platte River water for its then existing well field on the river near Ashland.

No action has been taken by the Department on any of these applications for the reason that it does not appear that they can be allowed under the present water appropriation laws. Representatives of these municipalities have been considering proposed legislation which would provide for permits to be granted in connection with municipal water uses and probably such proposed legislation will be introduced in the 1963 Legislature.

REPORT OF THE

Niobrara River Basin

Construction of the Merritt Dam and Reservoir and the 53-mile Ainsworth Canal to serve the 34,000-acre Ainsworth Unit was continued by the Bureau of Reclamation. At the end of the 1962 water year the dam was about 40% complete, construction was under way on the first section of the canal (14 miles), and the access road from Valentine to Merritt Dam, had been completed.

The feasibility studies and report for the O'Neill Unit of the Lower Niobrara River Division were completed during the summer of 1962, and it is anticipated that the Regional Director's report will be submitted to the Commissioner early in 1963. In October, 1962 a petition for the formation of the North Central Nebraska Reclamation District, to include lands within the 77,000-acre O'Neill Unit, was filed in the office of the Department and a hearing on the petition was scheduled for January 15, 1963.

The Bureau of Reclamation completed a reconnaissance report on the Mirage Flats Extension Unit, Upper Niobrara River Division. This 5,000-acre unit lies just down stream from the existing Mirage Flats project and would be supplied with waters developing in the Niobrara River down stream from the diversion dam for the existing project.

Big Blue River Basin

The engineering and economic feasibility of the Little Blue Unit on the Little Blue River was established by the Bureau of Reclamation and the Regional Director's report on the project was completed and transmitted to higher authority in June, 1962. The report proposes the irrigation of 20,000 acres of lands lying south of the Little Blue River, 13,000 acres near Ruskin, and 7,000 acres near Gladstone. The main features of the project are the multi-purpose Angus Dam on the Little Blue River, which would impound 427,000 acre-feet of Water of which 86,200 acre-feet are for irrigation and the remainder for flood control and silt; and necessary distribution canals and pumping plants. The benefit-cost ratio of the \$44,000,000 project is 1.23 to 1 on the basis of a 50-year analysis. The irrigators will repay about \$3,000,000 of the \$23,800,000 which is reimbursable and the remainder will be repaid by Missouri Basin Project Power revenues.

In December, 1961 the Little Blue Irrigation District was formed by 89 percent of the voters voting in favor of the proposition. A bill for the authorization of the Little Blue Unit was introduced in the 87th Congress, 2nd Session, but no action was taken on it.

The Elkhorn River Basin

Due to renewed interest in possible irrigation development in the Elkhorn River Basin, the Bureau of Reclamation initiated rec-

onnaissance land classification studies in the basin during 1961. These studies were completed in 1962, and plans were being made for more complete studies in 1963 in selected areas.

Basin-Wide Studies

During 1961 and 1962, at the request of local interests in the Elkhorn River Basin and in the Big and Little Blue River basins in Nebraska, the State Soil and Water Commission has undertaken the coordination of flood control, watershed protection, irrigation and other water and land resources programs and studies being made in those basins by the Corps of Engineers, Department of the Interior, Department of Agriculture and State and local agencies. A plan of work for each of the basins designed to minimize overlapping and duplication of effort has been developed by the Commission and subscribed to by the participating agencies. It is intended that all agencies will continue to present studies or initiate new work in accordance with the plan as funds become available in 1963.

PUBLIC POWER AND IRRIGATION DISTRICTS

Additional responsibilities with respect to public power and irrigation districts were assigned to the department by the 1961 Legislature. Legislative Bill 469 provides that before any electric utility may construct a transmission line carrying more than 700 volts, outside the corporate limits of a city or village, an application for such construction must be approved by the Department. The legislation, which is effective only until October 1, 1963, is intended to limit the duplication of transmission lines and services in areas where two or more utilities may provide service.

During the first year that the act was effective, there were 264 such applications filed and processed by the Department. All but six of the applications were disposed of without hearings on the basis of waivers filed by alternate power suppliers or upon a determination that no alternate power supplier existed who might provide the service economically and feasibly. The other six were decided on the basis of rather voluminous testimony and evidence adduced at hearings held before the Department as provided by LB 469.

During the biennium, four hearings were held by the Department on petitions of public power and irrigation districts to change certain provisions of their petitions for creation which resulted in changes as follows: •

The Central Nebraska Public Power and Irrigation District changed its principal place of business from Hastings to Holdrege.

The Norris Rural Public Power District eliminated the word "Rural" from the name and broadened scope of the nature of

business the district may engage in to give it all of the powers of a public power district as provided by law.

The Cornhusker Rural Public Power District eliminated the word "Rural" from the name, added to its territory two voting precincts in Greeley County and one in Wheeler County, and divided the district into five subdivisions for the election of directors.

The McCook Public Power District corrected an error with respect to the grouping of directors in a previous petition.

There are 51 districts of record which are organized under the public power and irrigation district act, of which ten are inactive. There were no new public districts organized during the biennium. Action on a petition to change the Nebraska Generation and Transmission Cooperative, Inc., to a public power district is still pending while awaiting request of the petitioners to decide the matter on which extensive hearings were held in September, 1959.

STATISTICAL SUMMARY

The following is a summary of the statistical record for the biennium ending September 30, 1962.

Applications for water appropriations	241
Appropriations canceled	143
Applications dismissed	13
Irrigation wells registered October 1, 1960 to September 30, 1962	1,040
Total irrigation wells registered	24,402
Hearings held Re: Water appropriations	38
Hearings held Re: Public Power Districts	13
Relocation petitions	6
Deeds recorded (involving 169 appropriations)	121
Reports of field investigations	90
Maps and plans	354
Stream measurements	8,613
Canal measurements	8,122
Stream gaging stations with recording gages	153
Stream gaging stations without recording gages	36
Canal gaging stations with recording gages	117
Fees collected covering:	
Applications for surface water, power leases, deeds, petitions and copying records	\$48,705.87
Fees collected covering:	
Registration of irrigation wells, spacing permits, and copying records	7,960.05
Total	\$56,665.92

REPORT OF THE

HICKMAN

V.

LOUP RIVER PUBLIC POWER DISTRICT

137 N. 428 - 113 NW 2nd 617

35112

Filed March 2, 1962

1. The Department of Water Resources of Nebraska has original and exclusive jurisdiction to hear and adjudicate all matters pertaining to water rights for irrigation, power, or other useful purposes, except as specifically limited by statute.

2. A representative suit is authorized by statute in this state when the question to be determined is one of common or general interest of many persons, or when the parties are numerous and it is impracticable to bring them all before the court.

3. Where a community of interest or a privity of estate exists between an intervener and other plaintiffs, a suit commenced before the expiration of the statutory period inures to the benefit of a person who intervenes therein after the time when an action would be barred.

4. Where the owner of a superior right seeks to acquire water being used for power purposes under an earlier priority he is limited to the statutory right of condemnation unless the just compensation can be determined by mutual agreement.

5. In a proceeding by a junior appropriator and others similarly situated to cancel and annul the appropriation of a senior appropriator, the Department of Water Resources has no authority to compel the acceptance of an offer of compensation in lieu of condemnation.

6. In a class action to cancel and annul an appropriation of public waters, an unaccepted offer by the respondent to waive its rights as against the petitioner does not make the question of the validity of respondent's appropriation moot.

7. One bringing a class action cannot dismiss the action for reasons personal to him over the objection of a person having a beneficial interest in the litigation common to that of the nominal petitioner. A court is bound by the same consideration in ruling on motions to dismiss.

Heard before Carter, Messmore, Yeager, Spencer, Boslaugh, and Brower, JJ.

CARTER, J.

This is an appeal by the petitioner Max D. Hickman from a final order of the Department of Water Resources of the State of Nebraska dismissing his petition for the cancellation and annulment of the appropriation rights of the respondents Loup River Public Power District and the United States of America, arising out of appropriation No. 2287 granted to Loup River Public Power District for 3,500 cubic feet of water per second of time with a priority date of September 15, 1932. Petitions of intervention filed by North Loup River Public Power and Irrigation District and its receiver R. L. Cochran and by Middle Loup Public Power and Irrigation District were also dismissed. Each of the interveners has perfected appeal to this court.

As a matter of convenience we shall hereafter refer to the petitioner as Hickman, to the respondent Loup River Public Power District as Loup District, to the North Loup River Public Power and Irrigation District as North Loup District, to R. L. Cochran, receiver of the North Loup River Public Power and Irrigation District, as receiver, to the Middle Loup Public Power and Irrigation District as Middle Loup District, to the Department of Water Resources of the State of Nebraska and its predecessors as department, and to the United States of America as United States.

The petitioner is the owner of an appropriation of the public waters of the Middle Loup River for the purpose of irrigation for 1.28 cubic feet per second of time with a priority date of October 23, 1939. His appropriation is junior in point of time to the claimed appropriation rights of Loup District, North Loup District, and Middle Loup District.

The Loup District obtained an appropriation of public waters of the Loup River for the purpose of generating power with a priority date of September 15, 1932, and with a diversion rate of 3,500 cubic feet per second of time. The purpose of this appropriation was for the operation of a hydroelectric power plant near Columbus, Nebraska. The diversion of water was to be made at a point below the confluence of the North Loup and Middle Loup Rivers, and other streams, to form the Loup River.

It is the contention of Hickman that in granting the corrected application of the Loup District the department fixed August 24, 1937, as the final date for perfecting the application of water to the beneficial use for which the appropriation was made. No appeal was taken from the order of the department approving the corrected application, and Hickman alleges that it was accepted and assented to by Loup District. Hickman further alleges that Loup District obtained from the department an extension of time for completing the construction work until July 1, 1938. Hickman alleges that Loup District did not complete its construction work until

September 1, 1938, that it applied no water to the beneficial use for which taken under its appropriation right until June 1, 1938, and that the maximum amount of water diverted under its appropriation prior to August 24, 1937, was 506 cubic feet per second of time, although there was additional water available in the Loup River subject to diversion by Loup District. Hickman alleges that the failure of Loup District to comply with the order of the department approving and allowing the corrected application of Loup District, including the failure to complete its works prior to the time limited in the order and to apply water to the beneficial use for which it was appropriated prior to August 24, 1937, resulted in a failure by Loup District to acquire a final and complete appropriation of the waters of the Loup District, or a vested right therein, or the priority date of September 15, 1932. Hickman asserts that the Loup District, irrespective of the foregoing facts, claims the right to divert the waters of the Loup River to the extent of 3,500 cubic feet per second of time with a priority date of September 15, 1932, and that said claimed appropriation right is superior to that of Hickman.

Hickman asserts that there are a great many appropriators of water for irrigation from the Loup River and its tributaries who have priority dates junior to September 15, 1932, and whose diversion points are upstream from the diversion point of the Loup District. The junior appropriators are alleged to be similarly situated as Hickman and the action is allegedly brought on their behalf.

Hickman further alleges that Loup District in 1955, and subsequent thereto, made demands upon the department to prevent diversions of water by junior appropriators unless payment be made by them as compensation for interference with its appropriation in lieu of condemnation. Hickman alleges that junior appropriators have been coerced into making payments of large sums of money to Loup District to obtain needed irrigation water when in truth and fact Loup District had no valid appropriation rights for the reasons hereinbefore stated. The contention is made that unless the purported appropriation by Loup District for power purposes is cancelled and annulled, Loup District will continue to demand and collect such payments as compensation for interference with its water supply.

The United States is made a party defendant because of a suit brought by it to condemn 260 cubic feet of water per second of time for irrigation purposes, the same being the first 260 cubic feet of water out of the 3,500 cubic feet of water per second of time alleged by Loup District to have been appropriated by it for the generation of power. It is alleged that the validity of the condemnation proceeding brought in the United States District Court for the District of Nebraska is wholly dependent upon the validity of the appropriation of Loup District.

The Middle Loup District and the North Loup District, as well as its receiver, filed petitions in intervention in the proceeding, praying for the cancellation and annulment of Loup District's appropriation right with the priority date of September 15, 1932, for the same reasons set out in Hickman's petition.

By answer filed to the petition Loup District admits that it has claimed the right to divert 3,500 cubic feet of water per second of time with a priority date of September 15, 1932, since March 23, 1934. It alleges a right superior to all appropriators whose applications for appropriative rights were filed subsequent to September 15, 1932, and that subsequent appropriators including Hickman may not interfere with the exercise of its rights except by formal condemnation proceedings or by an agreement for payment of compensation in lieu of condemnation, as provided by section 70-669, R. R. S. 1943. Loup District admits making demands upon the department to prevent interference with its appropriation by junior appropriators, that demands were made upon junior appropriators for compensation for interference in lieu of condemnation, and that it will continue to make such demands for compensation hereafter. Loup District alleges that it complied with all requirements of its granted application and that its appropriation is in all respects valid. It alleges that it entered into leases with Nebraska for the use of water for power purposes and paid the amounts due thereunder, all in accordance with section 46-236, R. R. S. 1943. Loup District alleges that for 19 years prior to 1958 it used all water of the Loup River available for diversion, except in times of flood and operational difficulties, during which time its appropriation rights were never assailed. It alleges the expenditure of \$13,000,000 during this period of time in the construction of its hydroelectric plants and its auxiliary facilities, and the making of long-term contracts with the users of electric power. It alleges that it borrowed large sums of money which remain unpaid, and which were loaned in reliance upon the validity of its appropriative right. It asserts that after 25 years, substantial evidence of facts and circumstances are no longer available. Based on these allegations, Loup District asserts estoppel, laches, and the statute of limitations as defenses.

As a further defense, Loup District alleges that by way of compromise it agrees that Hickman, without payment of compensation, may interfere with the appropriative right of Loup District to the extent of 1.28 cubic feet of water per second of time for all time in the future. Hickman refused to accept such compromise and insisted that Loup District's appropriative rights be cancelled and annulled. Loup District thereafter filed separate motions to dismiss Hickman's petition and the petitions of the interveners on the basis of Loup District's offer to Hickman to permit the latter's interference with Loup District's appropriative rights without compensation in lieu of condemnation to the extent of 1.28 cubic feet of water per sec-

ond of time. The department sustained the motions of Loup District to dismiss. Motions for a new trial were timely filed and overruled by the department. Hickman and interveners have each perfected appeals to this court.

The contention is advanced by Loup District that this is not a class action irrespective of the fact that it is alleged in Hickman's petition to be such. The department has original exclusive jurisdiction to hear and adjudicate all matters pertaining to water rights for irrigation, power, or other useful purposes, except as specifically limited by statute. S. 46-209, R. R. S. 1943. The authority thus granted necessarily includes the granting of appropriations of public waters, the adjudication of priorities, and the restriction or cancellation of approved applications for noncompliance with their terms or the statutory law of the state. Ainsworth Irr. Dist. V. Harms, 170 Neb. 228, 102 N. W. 2d 429; Ainsworth Irr. Dist. V. Bejot, 170 Neb. 257, 102 N. W. 2d 416. The exercise of such powers by the department is quasi-judicial in character. North Loup River Public Power & Irr. Dist. V. Loup River Public Power Dist., 162 Neb. 22, 74 N. W. 2d 863. The statute does not provide the procedure to be followed in the exercise of the jurisdiction granted, except to provide that the department shall adopt rules governing matters coming before it. The department appears to have followed the civil code in the formulation of the issues and in dealing with the pleadings filed. It is not contended that any adopted rule of the department was violated. Under such circumstances the department may properly follow code provisions in dealing with matters before it. This necessarily implies the right in a proper case to entertain an action on the behalf of one and others similarly situated and to permit intervention by persons having the required interest in the litigation.

Loup District argues that the common relationship of junior appropriations is insufficient to permit an action by one junior appropriator and all others similarly situated. The statutory right to maintain a class action provides: "When the question is one of a common or general interest of many persons, or when the parties are very numerous, and it may be impracticable to bring them all before the court, one or more may sue or defend for the benefit of all." S. 25-319, R. R. S. 1943. The only issue raised by Hickman is the question of the validity of the appropriation of the public waters of the Loup River by the Loup District. Each appropriator junior in point of time to the appropriation of Loup District has a common interest in the issue raised. A cancellation of Loup District's appropriation would have the effect of advancing the priority of each junior appropriator on the over-appropriated waters of the Loup River. It cannot be disputed that a holding for or against the Loup District would be a binding judgment on all junior appropriators. The action is of a common and general interest of many persons. Their interests are identical. A class action in such a situation is authorized by section 25-319, R. R. S. 1943.

The Loup District also contends that Middle Loup District, North Loup District, and the receiver, are not entitled to intervene in the action for the reason that they are barred by the time limitation contained in section 46-238, R. R. S. 1943. The applicable part of this statute provides: "Any application for an appropriative right which is deficient by reason of past failure to comply with any of the requirements of sections 46-233 and 46-238 for the perfection of an appropriative right, which application has not been dismissed or denied, is also hereby ratified and confirmed; unless, within one year from September 20, 1957, a petition to vacate such an order granting an extension of time, or a petition to forfeit, cancel or otherwise invalidate such an application for an appropriative right, shall have been filed with the department by a person affected adversely thereby. All rights and defenses which heretofore shall have accrued in favor of the grantee of such an extension shall be preserved." The record shows that Hickman filed his petition prior to September 20, 1958, and Middle Loup District, North Loup District, and the receiver did not file their petitions in intervention until after such date.

It is a clear from the foregoing statute that Middle Loup District, North Loup District, and the receiver lost any right they may have had to petition for the cancellation and annulment of the appropriation right of Loup District by failing to petition the department within the 1-year limitation. The question presently before the court is whether or not the Middle Loup District, the North Loup District, and the receiver, after a party adversely affected has within the 1-year limitation sought the cancellation and annulment of Loup District's appropriation right are barred from intervention to assert the interest which they have in the litigation.

The rule in such cases is stated by an authoritative text as follows: "The general rule seems to be that where a community of interest or a privity of estate exists between an intervener and other plaintiffs, a suit commenced before the expiration of the statutory period inures to the benefit of the person who intervenes therein after the time when an action would be barred. The reason for this holding is that an intervention does not constitute a new cause of action." Annotation, 8 A. L. R. 2d s. 42, p. 90. Although the rule appears to be one of first impression in this state, it is supported by a multitude of decisions from other jurisdictions which are cited in the footnotes to the foregoing quotation. See, *Maurer v. Miller*, 77 Kan. 92, 93 p. 596, 127 Am. S. R. 408, 15 Ann. Cas. 663; *Russell v. People's Nat. Bank of Belton (Tex. Civ. App.)*, 2 S. W. 2d 961; *Marsh v. United States*, 97 F. 2d 327. We conclude that Middle Loup District, North Loup District, and the receiver, were properly permitted to intervene.

The motions to dismiss the petition of Hickman and the interveners' petitions were based on the pleaded offer of Loup District

to permit interference with its water right in the future to the extent of 1.28 cubic feet of water per second of time. The sustaining of the motions to dismiss on this ground was erroneous.

The statutes of this state give a preferential use to waters for agricultural (irrigation) purposes over a use for power purposes. S. 70-668, R. R. S. 1943. They also provide that no inferior right to the use of waters of this state shall be acquired by a superior right without just compensation therefor to the inferior user. S. 70-669, R. R. S. 1943. It is further provided by section 70-672, R. R. S. 1943, that where the owner of a superior right seeks to acquire water being used for power purposes, and compensation to be paid cannot be agreed upon, the procedure to condemn property shall be exercised in the manner set forth in sections 76-704 to 76-724, R. R. S. 1943. We point out that Hickman has not attempted to condemn any of the waters appropriated by Loup District. Neither has he agreed with Loup District on the amount of compensation to be paid in lieu of condemnation. The effect of the dismissals by the department is for the department to accept the offer of Loup District on behalf of Hickman and then to impose its terms upon Hickman against his will. The department is clothed with no such authority.

We point out that the issue between Hickman and Loup District is the validity or invalidity of Loup District's appropriation. The validity of Hickman's appropriation is not in issue. The offer of Loup District, which the department feels is sufficient to make the issues moot and require a dismissal, overlooks the fact that it is dealing with a subject not in issue under the pleadings. Hickman pleaded the validity of his appropriation right only to show that he was a person affected adversely and therefore entitled to bring the action in accordance with section 46-238, R. R. S. 1943. We point out also that in a class action the one bringing the action cannot dismiss the action for reasons personal to him over the objection of a person having a beneficial interest in the litigation who is in the position of one similarly situated when substantial rights of other parties have accrued and injustice would result from the dismissal. But where, as here, petitions in intervention have been filed before the disposition of the case, the nominal petitioner cannot dismiss the entire action. Consequently, if for some reason the department could properly dismiss Hickman from the case for reasons personal to Hickman, the right of interveners to proceed is not affected thereby. We point out further that the United States claims to have acquired the first 260 cubic feet of water per second of time of Loup District's appropriation. The United States was not a party to Loup District's unaccepted compromise offer. From all that can be determined from the pleadings, this situation could well have been a critical factor in the failure of the parties to agree upon the compensation to be paid in lieu of condemnation. The disposition made does not take into consid-

eration the right of Hickman to recover payments made by him to obtain necessary water for irrigation. The record shows that a tender of such amount was made in this court but not in the proceedings before the department. We do not pass upon the validity of the tender because, whenever and wherever made, it cannot have the effect of making the litigation moot so as to require the dismissal of the action. For the reasons stated, the dismissals of the petition and the petitions in intervention are reversed.

The department is vested by statute with original jurisdiction to adjudicate all matters pertaining to the granting and cancellation of water rights and priorities. *North Loup River Public Power & Irr. Dist. v. Loup River Public Power Dist.*, *supra*. The limit of the jurisdiction of this court in the present appeal is to review the correctness of the department's dismissals of the petition and petitions in intervention. Having concluded that the department erred in sustaining the motions to dismiss, it remains for the department, in the exercise of its original jurisdiction, to determine the issues presented by the pleadings upon their merits. The orders sustaining the motions to dismiss are severally reversed and the cause is remanded to the department for further proceedings.

Simmons, C. J., participating on briefs.

DIVISION OF STATISTICS

THIS PAGE WAS INTENTIONALLY LEFT BLANK

WATER DIVISIONS AND WATER DISTRICTS

WATER DIVISIONS: DENOMINATION

The State of Nebraska is hereby divided into two water divisions, denominated Water Division No. 1 and Water Division No. 2, respectively. Reissue Revised Statutes, 1943, 46-215.

WATER DIVISION NO. 1. BOUNDARIES

Water Division No. 1 shall consist of all the lands of the state drained by the Platte rivers and their tributaries lying west of the mouth of the Loup river; and also all other lands lying south of the Platte and South Platte rivers that may be watered from other superficial or subterranean streams not tributary to the Platte river. Reissue Revised Statutes, 1943, 46-216.

WATER DIVISION NO. 2. BOUNDARIES

Water Division No. 2 shall consist of all lands that may be watered from the Loup, White, Niobrara and Elkhorn rivers and their tributaries, and all other lands of the state not included in any other water division. Reissue Revised Statutes, 1943, 46-217.

For convenience in the adjudication of claims and in the distribution of water, these divisions have been subdivided into twelve water divisions, denominated 1-A, 1-B, 1-C, 1-D, 1-E, 1-F, 2-A, 2-B, 2-C, 2-D, 2-E and 2-F, as shown on the opposite page.

CLAIMS AND APPLICATIONS

The following tables give a complete list of all claims and applications of record in the Department of Water Resources which have not been canceled. This list also includes applications which have been filed and not approved.

The claims and applications have been arranged in each water division by streams in alphabetical order, and the appropriations on each stream are arranged in order of priority.

Appropriations having docket numbers refer to claims covering rights which were acquired under the law prior to April 4, 1895, and those having application numbers were filed to appropriate water under the law of 1895.

Following these tables is a list of water appropriations which have been canceled in full or in part, or which have been dismissed during the past two years.
