

Thirty-Ninth Biennial Report

of the

DEPARTMENT OF WATER RESOURCES

TO

HONORABLE J. JAMES EXON

Governor of The State of Nebraska

LINCOLN, NEBRASKA

1971 - 1972

DEPARTMENT OF WATER RESOURCES

Dan S. Jones, Jr.
Director

Irrigation, Water
Power and Drainage
Registration of Wells

State of Nebraska

J. JAMES EXON, Governor
P. O. Box 94607
LINCOLN 68508

IN REPLY REFER TO

March 15, 1973

The Honorable J. James Exon
Governor of Nebraska
State Capitol Building
Lincoln, Nebraska 68509

Dear Governor Exon:

I have the honor to transmit to you herewith the Thirty-Ninth Biennial Report of the Department of Water Resources.

The Report contains a brief summary of the work of this Department during the two-year period ending September 30, 1972. It contains a detailed list of the water appropriations from natural streams and other statistical data relative to matters over which this Department has jurisdiction.

The biennium was unusual from the standpoint of water supply in that, for the first time in more than forty years, discharges of the North Platte and Platte Rivers reached flood stages during the spring and early summer of 1971, causing extensive damage to bridges and other structures along the river and to low lying lands. The runoff in the Platte River Basin was excessive also in 1972, but the flows were not damaging.

A high light of the biennium was the successful conclusion of the negotiation of a Compact with the State of Kansas apportioning the waters of the Big Blue River Basin between Kansas and Nebraska.

Respectfully submitted,

Director of Water Resources

DSJ:ejm

Thirty-Ninth Biennial Report

of the

DEPARTMENT OF WATER RESOURCES

TO

HONORABLE J. JAMES EXON

Governor of The State of Nebraska

LINCOLN, NEBRASKA

1971 - 1972

**EXECUTIVES AND EMPLOYEES
OF THE
DEPARTMENT OF WATER RESOURCES**

Dan S. Jones, Jr., Director of Water Resources	Lincoln
Marion E. Ball, Assistant Director	Lincoln
Stanley M. Christensen, Division Engineer I	Bridgeport
Mollie Bauer, Office Supervisor II	Lincoln
Robert F. Bishop, Division Engineer II	Lincoln
L. F. Zabel, District Water Engineer	Cambridge
David J. Neely, Chief Hydrographer	Bridgeport
David B. Ender, Division Water Engineer I	Ord
John H. Hintz, Hydrographer III	Hershey
Lloyd E. Powell, Jr., Hydrographer III	Bridgeport
James W. Vassos, Hydrographer II	Bridgeport
William H. Birkel, Hydrographer II	Lincoln
Thomas L. Hayden, Hydrographer II	Bridgeport
Karl A. Wadas, Hydrographer II	Ord
Norman N. McConnell, Hydrographer II	Cozad
Harvey Mortimore, Hydrographer I	Bridgeport
Thomas A. Mitchell, Hydrographer I	Crawford
Bruce C. Pedersen, Hydrographer I	Ord
Norman Langhofer, Hydrographer I	Bridgeport
Janis Stakens, Draftsman II	Lincoln
Thelma Pangle, Clerk General III	Lincoln
Dorothy Brening, Clerk General III	Bridgeport
Pamela Kay Prater, Clerk Typist I	Lincoln
Elinor J. Malone, Clerk Steno II	Lincoln
Annette Flock, Clerk Steno I	Lincoln
Eloise Novacek, Clerk Steno I	Lincoln
Gwendolyn Pokorski, Clerk Steno I	Lincoln
Marjorie Schluterbusch, Clerk Steno I	Bridgeport
Stella Talbert, Maid I	Bridgeport
Clayton Brunt, Gage Reader	Lewellen

WATER COMMISSIONERS

John W. Bacus, Loup River Basin	Litchfield
Thomas Lamberson, Loup River Basin	Palmer
Terry Lee, Loup River Basin	Ord
Clarence Johnson, North Platte River Basin	Paxton
Homer Nickell, North Platte River Basin	Bridgeport
Herschel Norris, Platte River Basin	Brady
Henry Pollman, Republican River Basin	Culbertson
Henry F. Brandt, Republican River Basin	Cambridge

OTHERS EMPLOYED DURING BIENNIUM

Edwin S. Kimmel, Division Engineer	Bridgeport
John G. Lathrop, Hydrographer II	Crawford
Marvin Witherwax, Hydrographer II.	Ord
Jodene Amateis, Clerk Steno I	Bridgeport
Joyce Guisti, Clerk Steno I.	Lincoln
Kay Foth, Clerk Steno I.	Lincoln
Sandra Hrdlicka, Clerk Steno I	Lincoln
Mary Jane Thurber, Clerk Steno I	Lincoln
Anna Griffin, Maid I.	Bridgeport
Joe Barden, Water Commissioner.	Bridgeport
Matt Curley, Water Commissioner	Keystone
Edward Haase, Water Commissioner.	Kimball
William Naeve, Water Commissioner.	Ord

NEBRASKA POWER REVIEW BOARD

Members:

Leo K. Wortman, Chairman	Lincoln
Joseph M. Dye.	North Platte
Thomas J. Fitchett	Lincoln
Claude L. Jelen	Omaha
John Shoemaker	Dannebrog

Employees:

Gary Gustafson, Executive Secretary and General Counsel . . .	Lincoln
Carol Buss, Secretary I	Lincoln

Other Board Members During Biennium:

Sheldon Bernstein	Omaha
Harold Oldfather	Kearney
Mark H. Vollbracht	St. Paul

FOREWORD

This Biennial Report is prepared in accordance with the provisions of Section 46-214, Reissue Revised Statutes, Nebraska, 1943. It is intended as a full report of the work of the Department of Water Resources with respect to water rights, water administration, and districts of various kinds over which the Department has jurisdiction.

The Report does not contain discharge records of streams nor the records of canal or pump diversions. Such records are published in the annual reports of the U.S. Geological Survey and in the Department's Biennial Hydrographic Reports. The activities of the Power Review Board are published annually following the end of each fiscal year.

WATER SUPPLY

The water supply in the North Platte River drainage was above normal in 1971 and 1972. The 1,633,000 acre-feet runoff above Pathfinder Reservoir in 1971 was 169% of normal, the highest since 1929. During 1972 the figure dropped to 1,018,600 acre-feet or approximately 105% of normal. Water was released from Wyoming Reservoirs during the early months of both 1971 and 1972 evacuating space for the above normal spring runoff.

The high flows in the North Platte River during May and June of 1971 caused considerable consternation among residents in the low lying areas of the valley from Torrington, Wyoming to North Platte, Nebraska. The U.S. Corps of Engineers responding to requests for flood protection, constructed dikes to protect the municipalities of Torrington, Scottsbluff, Bridgeport and North Platte. An additional private dike was constructed to protect the northern portion of Terrytown, Nebraska.

Record flows were experienced on the lower Laramie River near the Wyoming city of Fort Laramie where the peak of record occurred on May 6, 1971, with an instantaneous discharge of 5,610 cubic feet per second. Additional peak discharges of gaging stations along the North Platte River in Nebraska during 1971: Mitchell on June 2—12,200 cfs; Minatare on June 2—14,900 cfs; Bridgeport on June 4—16,400 cfs; Lewellen on June 4—13,500 cfs; Keystone on June 10—8,580 cfs; North Platte on June 10—9,580 cfs.

The high water in the North Platte River during the spring of 1971 caused significant damage to irrigation structures, lowland farm ground and a few farm buildings. On June 19th the state highway bridge spanning the river south of Morrill failed. A pontoon bridge was installed by the Army Engineers from Fort Carson, Colorado to alleviate transportation inconveniences. Repairs to the permanent bridge were completed in September and the pontoon bridge was removed.

The total flow in the North Platte River at the Wyoming-Nebraska State Line station was 1,454,000 acre-feet in 1971 and 656,000 acre-feet in 1972 or approximately 290% and 130% of normal. At Lewellen the 1971 flow equaled 2,042,000 acre-feet, in 1972 1,214,640 acre-feet compared to the annual mean of 977,500 acre-feet. The Platte River station at Odessa recorded a total 1971 flow of 2,148,000 acre-feet and 1,258,940 acre-feet the following year or 220% and 130% of normal.

Although there was considerable economic loss, apprehension and inconvenience caused by the high water during the 1971 water year, there also occurred some benefit created by this same circumstance. All of the storage appropriations in the upper North Platte region were filled in both 1971 and 1972, insuring a plentiful water supply for storage appropriators and above average return flows for natural flow appropriations. The results were evidenced in the outstanding crop production during both years.

Two reservoirs reached record maximum storage impoundment during 1971. Glendo Reservoir with 727,124 acre-feet on May 24th and Kingsley with 1,919,600 acre-feet on June 12-16.

The flow of the South Platte River into Nebraska during 1971 was 588,300 acre-feet or 148% of average. The 1972 total of 201,400 or 51% was indicative of the extremely dry summer months and rather acute shortage of water available to the Western Canal.

Niobrara River water for the Mirage Flats project was deficient during the biennium. The 1971 flow of 22,920 acre-feet was 104% of normal; however, the record low Box Butte Reservoir carryover from the previous year negated any appreciable benefit from the slightly above normal supply. The 1972 inflow of 18,990 acre-feet was 86% of normal. Irrigation diversion by the project amounted to 21,010 acre-feet in 1971 and 16,350 acre-feet in 1972. Heavy use of ground water was made both years to supplement the rather meager surface supply.

In the Republican River Basin the runoff in 1971 was the shortest in more than sixteen years. Three of the five major reservoirs in the basin failed to fill for the first time in fifteen years. However, due to timely rains during the irrigation season the project water supply was generally satisfactory except for the lands served by Enders Reservoir where storage supplies were exhausted about thirty days before the end of the irrigation season. The situation in 1972 was similar to that of the previous year in that Enders, Swanson Lake and Harlan County Reservoirs were only 75% to 85% filled. The summer moisture was such that the demand for water was less than in 1971, so the carryover in the fall of 1972 was considerably greater than it was the year before.

The water supply in the eastern and northeastern parts of the State during the biennium was generally very satisfactory. However, for a time it was necessary in 1971 to close a number of junior appropriators in the Big Blue River Basin and in the KeyaPaha River Basin.

The U.S. Environmental Data Service weather publications indicate Nebraska received 103% of normal precipitation during the 1971 water year with recorded amounts varying from 120% in the southwest to 84% in the southeast. In 1972 the state average was 111% of normal, ranging from 123% in the northeast division to 101% in the panhandle, southwest and southeast divisions.

Precipitation by geographic divisions as reported by the U.S. Department of Commerce, Environmental Data Service:

Division	Water Year	Total (in inches)	% of normal	Normal
Panhandle	1971	18.74	114	16.37
	1972	16.56	101	
North Central	1971	22.50	113	19.91
	1972	22.44	113	
Northeast	1971	25.80	104	24.69
	1972	30.48	123	
Central	1971	22.66	106	21.45
	1972	23.78	111	
East Central	1971	26.14	99	26.50
	1972	31.49	119	
Southwest	1971	22.28	120	18.55
	1972	18.70	101	
South Central	1971	21.82	99	21.97
	1972	24.69	112	
Southeast	1971	24.69	84	29.24
	1972	29.44	101	
Entire State	1971	23.08	103	22.34
	1972	24.70	111	

An unusual event occurred at Kingsley Dam on May 1, 1972. Winds of extremely high velocity from the west persisted throughout the day and until about 11 P.M. on May 1st. The waves undercut the concrete wave wall atop the dam in several places, and eleven of the forty-foot sections of the wall had collapsed by midnight. The water in the reservoir stood at 3265.5 feet, approximately 25 feet below the crest of the dam and about 29 feet below the top of the wave wall. The Central Nebraska Public Power and Irrigation District, owner of the structure, immediately assembled available equipment and material; and work on the repair of the dam was begun during the forenoon of May 2nd.

A team of consultants was employed by the Central District to advise as to the making of the repairs. As a result of the recommendations of the consultants, rock was shipped in from Guernsey, Wyoming, and a contract was let for placing it in and on the face of the dam. The repair work, which was to continue into early 1973, was being done at a cost of more than three quarters of a million dollars. With the repairs as now completed the dam is considered stronger than it ever has been.

COMPARISON OF STORAGE IN RESERVOIRS

1 Capacity to top of irrigation pool consists of 64,780 a.f. of dead and power head water and 100,000 storage for irrigation.

2 When maximum storage exceeds capacity of irrigation pool, it indicates some water is being held in flood control pool.

- a 1960-1972 record used for average
- b 1962-1972 record used for average
- c 1963-1972 record used for average
- d 1964-1972 record used for average

ADMINISTRATION

The water supply in the North Platte River drainage was above normal during both years of the biennium; however, the usual shortages were experienced during the months of July and August when junior appropriators were denied water for varying periods of time.

The following are summaries of closing orders issued during 1971 and 1972:

PLATTE RIVER BASIN 1971 Season

On August 16 closed canals and pumps upstream from Range 26 W. to Range 38 W. to protect rights antedating September 7, 1926.

On August 26 opened canals and pumps upstream from Range 26 W. to Range 38 W.

1972 Season

On July 15 closed canals and pumps upstream from Range 26 W. to Range 38 W. to protect rights antedating September 7, 1926.

On July 23 closed canals and pumps upstream from Range 23 W. to Range 58 W. to protect rights antedating December 28, 1894.

On July 24 opened canals and pumps upstream from Range 23 W. to Range 58 W. senior to September 7, 1926.

On July 29 opened all canals and pumps on the North Platte, South Platte and Platte Rivers to natural flow.

On August 21 closed canals and pumps upstream from Range 23 W. to Range 58 W. to protect rights antedating January 23, 1895.

On August 29 opened all canals and pumps on the North Platte, South Platte and Platte Rivers to natural flow.

OTHER BASINS

In the Niobrara River Basin appropriations upstream from the Mirage Flats diversion and junior to January 25, 1937, were closed from July 1 to September 14, 1971, and from July 4 to September 9, 1972.

Canals and pumps on Pumpkinseed Creek upstream and junior to Docket 840 were closed from July 19 to September 1, 1971, and from July 13 to September 1, 1972.

Canals on Blue Creek with priorities junior to September 7, 1893, were closed periodically during 1971 and 1972.

In the Hat Creek Basin five (5) appropriations on Jim Creek were closed from August 24 to November 20, 1971, to benefit an 1889 appropriation.

HYDROGRAPHY

The cooperative stream gaging program with the U.S. Geological Survey was continued during the biennium with each of the parties participating to the extent of \$110,000 during fiscal year 1971 and \$115,500 in fiscal year 1972. Although the increase each year of \$5500 barely met the increased costs of doing business we were able to expand the water quality field measurement activity to meet current requirements.

During the biennium Department hydrographers accomplished water quality field measurements on a regular schedule at 89 stations in Nebraska and eastern Wyoming. The measurements include air and water temperature, specific conductance, pH, dissolved oxygen, turbidity, total and fecal coliforms. Numerous filtered and unfiltered samples were collected for laboratory analysis. Results of the water quality data collections are published by the U.S. Geological Survey as Water Resources Data for Nebraska, Part 2.

Department personnel also participated in several special studies in cooperation with the Geological Survey and the U.S. Environmental Protection Agency.

INTERSTATE COMPACTS

The Kansas-Nebraska Big Blue River Compact which apportions the water of the Big Blue River between the States of Kansas and Nebraska was signed by the members of the Compact Commission on January 25, 1971, after nearly ten years of negotiating. The Compact was ratified by the Legislatures of the States of Kansas and Nebraska in their 1971 sessions. It became effective on June 6, 1972, when it was signed by President Nixon.

The Compact provides for the management of the waters of the Big and Little Blue Rivers in Kansas and Nebraska and creates an interstate agency known as the Kansas-Nebraska Big Blue River Compact Administration to administer its terms. The membership of the administration is composed of one ex officio member and one advisory member of each of the signatory States and a federal representative if the President desires to designate one. The ex officio member from each state is the official responsible for administering the water rights laws in his state, and the advisory member from each state is a resident of the Big Blue River Basin in his state who is appointed by the Governor for a four-year term. At the time of this Report the President had not designated a representative. Neither had the Governor of Kansas appointed an advisory member. Mr. Albert Schoenrock of Gladstone, Nebraska, is the advisory member from this State. At a meeting of the ex officio members subsequent to the effective date of the Compact, the Director of the Nebraska Department of Water Resources was elected to serve as the first Chairman of the Administration. A copy of the Big Blue River Compact appears elsewhere in this Report.

The Republican River Compact Administration which was established by the water officials of Colorado, Kansas and Nebraska to administer the Republican River Compact held two annual meetings during the biennium at which reports were received on virgin water supply and consumptive use of water for the streams of the Basin. Reports of the annual meetings have been published and distributed.

No formal administrative agency is provided for the administration of the other two interstate streams compacts to which Nebraska is a party, the South Platte River Compact with Colorado and the Upper Niobrara River Compact with Wyoming.

LEGISLATION

The Nebraska Legislature in 1971 amended the laws relative to the storing of water in reservoirs so that the law now gives the Department of Water Resources authority to require the owner or operator of a reservoir to pass through the reservoir outlet a portion of the inflow to supply water in the stream for livestock in such amounts and at such times as the Director of Water Resources determines. The amended laws require that the reservoir outlet works shall be so installed that these orders may be complied with.

The Natural Resources District law which was passed in 1969 was amended during the biennium so that there are 24 such districts instead of 33 as previously established by the Natural Resources Commission. Under the provisions of this law, no ground water conservation district or rural water district can be formed after June 30, 1972. The functions of such districts will apparently be carried out by subdistricts of the Natural Resources Districts, to be organized as required. Prior to June 30, 1972, this Department had the responsibility of recommending boundaries for proposed ground water conservation districts and for approving petitions for formation of rural water districts.

NEW DEVELOPMENT

Irrigation from ground water continued to expand and at an accelerated rate as evidenced by the registration of 4251 wells during the biennium. This increase of 1251, or 40%, over the number of wells in the previous two years is remarkable because of the unusually favorable moisture conditions which prevailed over most of the State, especially in 1972.

Nine additional rural water districts were organized in the State prior to July 1, 1972, as follows:

- Boyd County Rural Water District No. 2
- Cass County Rural Water District No. 1
- Cass County Rural Water District No. 2
- Cumming County Rural Water District No. 1
- Dawes County Rural Water District No. 1
- Nemaha County Rural Water District No. 2
- Otoe County Rural Water District No. 2
- Otoe County Rural Water District No. 3
- Richardson County Rural Water District No. 2

The North Loup Division on the North Loup and Loup Rivers and the O'Neill Unit on the Niobrara River, both parts of the Missouri River Basin Pick-Sloan Plan, were authorized by the Congress late in the 1972 Session. These two projects, along with the Nebraska Mid-State Division, make three authorized projects

in Nebraska with a total proposed development of 270,000 acres. These projects now await the completion of planning by the U.S. Bureau of Reclamation and the availability of construction funds.

During the early part of 1972 the landowners in the O'Neill Unit petitioned the County Board of Holt County to form an irrigation district, to be known as the Niobrara Basin Irrigation District, to include some 77,000 acres in Holt and Keya-Paha Counties. In the election on the formation of a district held in August of 1972, more than 80% of the voters favored the formation of the district. The lands in the O'Neill Unit are now covered by the Irrigation District as well as the North Central Nebraska Reclamation District.

STATISTICAL SUMMARY

The following is a summary of statistical data for the biennium ending September 30, 1972:

Applications for water appropriations	657
Applications dismissed	12
Hearings Re: Cancellation of water appropriations	335
Appropriations cancelled	340
Appropriations cancelled in part	111
Wells registered October 1, 1970 to September 30, 1972.	4,251
Total wells registered to September 30, 1972	40,040
Hearings held Re: Public Power and Public Power and Irrigation District Organization	5
Rural Water Districts formed	9
Relocation petitions.	3
Deeds recorded (involving 502 appropriations).	222
Reports of field investigations	446
Reports of dam inspections	1,303
Maps and plans examined.	472
Stream measurements	7,866
Canal measurements.	6,378
Stream gaging stations, recording.	153
Stream gaging stations, non-recording	168
Canal gaging stations, recording	121
Crest stage gages	117
Partial record stations, U.S.G.S.	63
Water quality sampling stations	89
Water quality field measurements.	1,683
Ground water observation wells with recorders	18
Ground water observation wells without recorders	1,300

**Fees Collected for Period
July 1, 1970 to June 30, 1972**

Applications for surface water, power leases, deeds, petitions and copying records	\$52,595.72
Registration of wells, spacing permits, and copying well records. Total	\$30,013.00
Assessments on electrical utilities for support of Power Review Board	\$89,544.42

WELLS REGISTERED IN NEBRASKA
To October 1, 1972

INTERSTATE COMPACTS

KANSAS – NEBRASKA BIG BLUE RIVER COMPACT**PREAMBLE**

The State of Kansas and the State of Nebraska, acting through their duly authorized Compact representatives, Keith S. Krause for the State of Kansas and Dan S. Jones, Jr., for the State of Nebraska, after negotiations participated in by Elmo W. McClendon, appointed by the President as the representative of the United States of America, and in accordance with the consent to such negotiations granted by an Act of Congress of the United States of America, approved June 3, 1960, Public Law 489, 86th Congress, 2nd Session, have agreed that the major purposes of this Compact concerning the waters of the Big Blue River and its tributaries are:

- A. To promote interstate comity between the States of Nebraska and Kansas;
- B. To achieve an equitable apportionment of the waters of the Big Blue River Basin between the two States and to promote orderly development thereof; and
- C. To encourage continuation of the active pollution-abatement programs in each of the two States and to seek further reduction in both natural and man-made pollution of the waters of the Big Blue River Basin.

To accomplish these purposes, the said States have agreed as set forth in the following Articles.

Article I – DEFINITIONS

As used in this Compact:

- 1.1 The term "State" shall mean either State signatory hereto, and it shall be construed to include any person, entity, or agency of either State who, by reason of official responsibility or by designation of the Governor of the State, is acting as an official representative of the State;
- 1.2 The term "Kansas-Nebraska Big Blue River Compact Administration," or the term "Administration," means the agency created by this Compact for the administration thereof;
- 1.3 The term "Big Blue River Basin" means all of the drainage basin of the Big Blue and Little Blue Rivers in Nebraska and Kansas downstream to the confluence of the Big Blue River with the Kansas River near Manhattan, Kansas;
- 1.4 The term "Big Blue River Basin in Nebraska" means all of the drainage basin of the Big Blue River in Nebraska and is exclusive of the drainage basin of the Little Blue River in Nebraska;

- 1.5 The term "minimum mean daily flow" means the minimum mean flow for any one calendar day;
- 1.6 The term "pollution" means contamination or other undesirable alteration of any of the physical, chemical, biological, radiological, or thermal properties of the waters of the basin, or the discharge into the waters of the basin of any liquid, gaseous, or solid substances that create or are likely to result in a nuisance, or that render or are likely to render the waters into which they are discharged harmful, detrimental, or injurious to public health, safety, or welfare, or that are harmful, detrimental, or injurious to beneficial uses of the water;
- 1.7 The term "water project" means any physical structure or any man-made changes which affect the quantity or quality of natural water supplies or natural streamflows and which are designed to bring about greater beneficial use of the water resources of an area;
- 1.8 The term "natural flow" means that portion of the flow in a natural stream that consists of direct runoff from precipitation on the land surface, ground-water infiltration to the stream, return flows to the natural stream from municipal, agricultural, or other uses, and releases from storage for no designated beneficial use;
- 1.9 The term "inactive water appropriation" means a water right that is subject to cancellation or termination for non-use.

Article II – DESCRIPTION OF THE BASIN

- 2.1 The Big Blue River, a tributary of the Kansas River, drains an area of 9,696 square miles in south central Nebraska and north central Kansas. About 75 percent of the Big Blue River Basin is in Nebraska, and the remainder is in Kansas. The Big Blue River and its principal tributary, the Little Blue River, join near Blue Rapids, Kansas. From there, the Big Blue River flows generally southward to join the Kansas River near Manhattan, Kansas, as shown on Exhibit A.
- 2.2 Much of the upper portion of the basin in Nebraska is underlain with sands and gravels that supply large quantities of water to irrigation wells. The lower portion of the basin in Nebraska and that portion of the basin in Kansas lack significant ground-water supplies except within the major stream valleys.

Article III – ORGANIZATION OF COMPACT ADMINISTRATION

- 3.1 Administration Agency. There is hereby established an interstate administrative agency, to be known as the "Kansas-Nebraska Big Blue River Compact Administration," to administer the Compact.

- 3.2 Administration Membership. The Administration shall be composed of one ex officio member and one advisory member from each State, plus a Federal member to be appointed by the President if he so desires. The ex officio member from each State shall be the official charged with the duty of administering the laws of his State pertaining to water rights. Said official shall designate a representative who may serve in his place at meetings of the Administration. All actions taken by the designated representative in the transaction of the business of the Administration shall be in the name of the official he represents and shall be binding on that official. The advisory member from each State may serve in any capacity within the Administration. He shall reside in the Big Blue River Basin portion of the State he represents.

The Governor of each State shall appoint the advisory member from that State for a term of 4 years. This appointment shall be made within 90 days after the effective date of this Compact.

- 3.3 Administration Government. The Administration shall hold its first meeting within 120 days after the effective date of this Compact, and it shall meet at least annually thereafter. The Federal member, if one be designated, shall serve as Chairman, without vote. If no Federal representative is appointed, the Administration shall select a Chairman, in addition to such officers as may be provided for in the rules and regulations, to serve at the will of the Administration. A meeting quorum shall consist of the ex officio members from both States, or their designated representatives. Each State shall have but one vote, cast by the ex officio member or his representative. All actions must be approved by both ex officio members or their representatives. Minutes of each meeting shall be kept, and they shall be available for public inspection.
- 3.4 Administration Powers and Duties. The Administration shall have the power to adopt rules and regulations consistent with the provisions of this Compact, to enforce such rules and regulations, and to otherwise carry out its responsibilities. It may institute action in its own name in courts of competent jurisdiction to compel compliance with the provisions of this Compact and with the rules and regulations it adopts.

The Administration is hereby authorized to employ the technical and clerical staff necessary to carry out its functions, and to maintain the office and appurtenances necessary to conduct its business. It may employ attorneys, engineers, or other consultants. It may purchase equipment and services necessary to its functions.

The Administration shall publish an annual report including a review of its activities and financial status. It may also prepare and publish such other reports and publications as it deems necessary.

In order to provide a sound basis for carrying out the apportionment provisions of this Compact, the Administration shall cause to be established such stream-gaging stations, ground-water observation wells, and other data-collection facilities as are necessary for administering this Compact; and it shall

install such other equipment and collect such data therefrom, for a period of not less than 5 years, as are necessary or desirable for evaluating the effects of pumping of wells on the flows of the Big Blue and Little Blue Rivers at the Kansas-Nebraska state line. The well area to be considered is described in Article V, paragraph 5.2.

The Administration shall have authority to accept funds from local, State, and Federal sources. It may enter into cooperative agreements and contribute funds to support such data-collection and analysis programs as are necessary for administration of the Compact.

Article IV – RESPONSIBILITY OF EACH STATE

- 4.1 Expenses of Administration. Each State and Federal member of the Administration shall receive such compensation and such reimbursement for travel and subsistence as are provided by the government he represents, and he shall be paid by that government.
- 4.2 Budget. Each year, the Administration shall prepare a properly documented budget covering the anticipated expenditures of the Administration for the following fiscal period. Each State shall make provision in its budget for funds to pay its share of the expenses of the Administration, which shall be divided equally between the States of Kansas and Nebraska. The Administration shall establish a fund to which each State shall contribute equally and from which the expenses of the Administration shall be paid.
- 4.3 Records and Information. The State of Kansas and the State of Nebraska shall cooperate with the Administration and furnish to it such records, information, plans, data, and assistance as may be reasonably available; and they shall keep the Administration advised of Federal activities in connection with planning, design, construction, operation, and maintenance of water-resource projects in the Big Blue River Basin.

Any local, public, or private agency collecting water data or planning, designing, constructing, operating, or maintaining any water project or facility in the Big Blue River Basin shall keep the Administration advised of its investigations and of any proposed changes and additions to existing projects and facilities, and it shall submit plans for new projects to the Administration for review of those project aspects affecting surface-water flowage and quality.

Article V – APPORTIONMENT OF WATERS OF THE BIG BLUE RIVER BASIN

- 5.1 Principles of Apportionment. The physical and other conditions peculiar to the Big Blue River Basin constitute the basis for this apportionment, and neither of the signatory States hereby, nor the Congress of the United States by its consent hereto, concedes that this apportionment establishes any general principle with respect to any other interstate stream.

The States of Kansas and Nebraska subscribe to the principle of including storage capacity for low-flow regulation in reservoirs constructed by the U.S. Bureau of Reclamation and the U.S. Army Corps of Engineers, and to the principle of such administration as is required to assure that water released from storage for low-flow regulation shall remain available in the stream to accomplish its intended purpose.

5.2 Nebraska Apportionment. The State of Nebraska shall have free and unrestricted use of the waters of the Little Blue and Big Blue River Basins in Nebraska, such use to be in accordance with the laws of the State of Nebraska, subject to the limitations set forth below.

(a) Water appropriations of record in the Little Blue and Big Blue River Basins in Nebraska on November 1, 1968, that were then inactive, shall be cancelled by due process of laws in effect in that State.

(b) During the period, May 1 - September 30, the State of Nebraska shall regulate diversions from natural flow of streams in the Little Blue and Big Blue River Basins by water appropriators junior to November 1, 1968, in order to maintain minimum mean daily flows at the state-line gaging stations (which are now located at Fairbury and Barneston, respectively, but which may be relocated at such other places as may be designated state-line gaging stations by the Administration) during each month as follows:

<u>Little Blue River</u>		<u>Big Blue River</u>	
May	45 cfs	May	45 cfs
June	45 cfs	June	45 cfs
July	75 cfs	July	80 cfs
August	80 cfs	August	90 cfs
September	60 cfs	September	65 cfs

When such action is necessary to maintain the above schedule of flows, the State of Nebraska shall:

- (1) Limit diversions by natural-flow appropriators in Nebraska in accordance with their water appropriations;
- (2) Close, in reverse order of priority, natural-flow appropriations with priority dates subsequent to November 1, 1968, including rights to store water in the conservation-storage zones of reservoirs;
- (3) Enjoin all persons not holding valid natural-flow appropriations from taking water during periods when the exercise of junior natural-flow appropriations is being restricted;
- (4) Regulate, in the same manner that diversion of natural-flows is regulated, withdrawals of water from irrigation wells installed after November 1, 1968, except equivalent wells drilled to replace wells installed before that date, in the alluvium and valley side terrace deposits within one mile from the thread of the river and between the mouth of Walnut Creek and

the Kansas-Nebraska state line on the Little Blue River and between the mouth of Turkey Creek and the Kansas-Nebraska state line on the Big Blue River (as delineated on Exhibits A and B of Supplement No. 1 to the Report of the Engineering Committee) provided that, if the regulation of such wells fails to yield any measureable increases in flows at the state-line gaging stations as determined by the investigations to be undertaken under Article III, paragraph 3.4, the regulation of such wells shall be discontinued. Determination of the effect on streamflow of the pumping of such wells shall rest with the Administration.

Delivery of water under the terms of this article shall be deemed to be in compliance with its provisions when the amounts passing the state-line gaging stations are substantially equivalent to the scheduled amounts. Minor irregularities in flow shall be disregarded.

(c) The storage capacity provided in reservoirs in the Little Blue River Basin in Nebraska shall be limited to a total of 200,000 acre-feet. Similarly, the storage capacity in reservoirs in the Big Blue River Basin in Nebraska shall be limited to 500,000 acre-feet. These limitations are exclusive of storage capacity that may be found necessary for regulation and use of waters imported into these basins in Nebraska; exclusive of storage capacity in small reservoir projects where the storage of water for subsequent use is less than 200 acre-feet; exclusive of storage capacity allocated to sedimentation and flood control; and exclusive of storage capacity allocated to, and from which water is released to accomplish, low-flow augmentation for improvement of water quality, for fishery, wildlife, or recreation purposes, or for meeting the flow schedules at the Kansas-Nebraska state line as set out in Article V, paragraph 5.2.

- 5.3 Kansas Apportionment. The State of Kansas shall have free and unrestricted use of all waters of the Big Blue River Basin flowing into Kansas from Nebraska in accordance with this Compact, and of all waters of the basin originating in Kansas, excepting such waters as may, in the future, flow from Kansas into Nebraska.
- 5.4 Transbasin Diversion. In the event of any importation of water into the Big Blue River Basin by either State, the State making the importation shall have exclusive use of such imported water, including identifiable return flows therefrom. Neither State shall authorize the exportation from the Big Blue River of water originating within that basin without the approval of the Administration.

Article VI – WATER QUALITY CONTROL

- 6.1 The States of Kansas and Nebraska mutually agree to the principle of individual State efforts to control natural and man-made water pollution within each State and to the continuing support of both States in active water pollution control programs.
- 6.2 The two States agree to cooperate through their appropriate State agencies, in the investigation, abatement, and control of sources of alleged interstate pollution within the Big Blue River Basin whenever such sources are called to their attention by the Administration.

- 6.3 The two States agree to cooperate in maintaining the quality of the waters of the Big Blue River Basin at or above such water quality standards as may be adopted, now or hereafter, by the water pollution control agencies of the respective States in compliance with the provisions of the Federal Water Quality Act of 1965, and amendments thereto.
- 6.4 The two States agree to the principle that neither State may require the other to provide water for the purpose of water quality control as a substitute for adequate waste treatment.

Article VII – GENERAL PROVISIONS

- 7.1 Right to Store Water in Upper State. The right of the State of Kansas or of any person, corporation, local agency, or entity in Kansas to construct or participate in the future construction and use of any storage reservoir or diversion works in the Big Blue and Little Blue Basins of Nebraska for the purpose of regulating water to be used in Kansas shall never be denied; provided, that such right is subject to the laws of the State of Nebraska and that any such storage for use by Kansas shall be excluded from the limitations on storage under Article V, paragraph 5.2(c).

Releases of water from storage provided by Kansas interests in the State of Nebraska shall not be counted toward meeting the minimum flow requirements at the State line under the provisions of paragraph 5.2(b).

- 7.2 Disclaimer. Nothing contained in this Compact shall be deemed:
 1. To impair, extend, or otherwise affect any right or power of the United States, its agencies, or its instrumentalities involved herein;
 2. To subject to the laws of the States of Kansas and Nebraska any property or rights of the United States that were not subject to the laws of those States prior to the date of this Compact;
 3. To interfere with or impair the right or power of either signatory State to regulate within its boundaries the appropriation, use, and control of waters within that State consistent with its obligations under this Compact.
- 7.3 Invalidity in Part. Should a court of competent jurisdiction hold any part of this Compact to be contrary to the constitution of either signatory State or to the Constitution of the United States, all other severable provisions of this Compact shall continue in full force and effect.
- 7.4 Future Review. After the expiration of 5 years following the effective date of this Compact, the Administration may review any provisions hereof; and it shall meet for such review whenever a member of the Administration from either State requests such review. All provisions hereof shall remain in full force and effect until changed and amended within the intent of the Compact by unanimous action of the Administration, and until such changes in

this Compact are ratified by the Legislatures of the respective States and are consented to by the Congress of the United States, in the same manner that this Compact is required to be ratified and consented to before it becomes effective.

- 7.5 Termination. This Compact may be terminated at any time by appropriate action of the Legislatures of both signatory States. In the event of amendment or termination of the Compact, the water-resource developments made in compliance with, and reliant upon, this Compact shall continue unimpaired.

Article VIII – RATIFICATION

- 8.1 This Compact shall become binding and obligatory when it shall have been ratified by the Legislature of each State and consented to by the Congress of the United States and when the Congressional Act consenting to this Compact includes the consent of Congress to name and join the United States as a party in any litigation in the United States Supreme Court, if the United States is an indispensable party and if the litigation arises out of this Compact or its application, and if a signatory State is a party thereto.
- 8.2 Notice of ratification by the Legislature of each State shall be given by the Governor of that State to the Governor of the other State and to the President of the United States, and the President is hereby requested to give notice to the Governor of each State of the consent by the Congress of the United States.

IN WITNESS WHEREOF the authorized representatives have executed three counterparts hereof, each of which shall be and constitute an original, one of which shall be deposited with the Administrator of General Services of the United States, and one of which shall be forwarded to the Governor of each State.

Done at Lincoln, Nebraska, this 25th day of January 1971.

/s/ Keith S. Krause
KEITH S. KRAUSE
Commissioner for the State of Kansas

/s/ Dan S. Jones, Jr.
DAN S. JONES, JR.
Commissioner for the State of Nebraska

APPROVED:

ELMO W. McCLENDON
Representative of the United States of America

DIVISION OF STATISTICS

THIS PAGE INTENTIONALLY LEFT BLANK

The State of Nebraska is hereby divided into two water divisions, denominated Water Division No. 1 and Water Division No. 2, respectively. Reissue Revised Statutes, 1943, 46-215.

WATER DIVISION NO. 1: BOUNDARIES

Water Division No. 1 shall consist of all the lands of the state drained by the Platte rivers and their tributaries lying west of the mouth of the Loup river; and also all other lands lying south of the Platte and South Platte rivers that may be watered from other superficial or subterranean streams not tributary to the Platte river. Reissue Revised Statutes, 1943, 46-216.

WATER DIVISION NO. 2: BOUNDARIES

Water Division No. 2 shall consist of all lands that may be watered from the Loup, White, Niobrara and Elkhorn rivers and their tributaries, and other lands of the state not included in any other water division. Reissue Revised Statutes, 1943, 46-217.

DISTRIBUTION

For convenience in the administration of the water laws and the distribution of water, these divisions have been subdivided into twelve water divisions, denominated 1-A, 1-B, 1-C, 1-D, 1-E, 1-F, 2-A, 2-B, 2-C, 2-D, 2-E, and 2-F, as shown on the opposite page.

CLAIMS AND APPLICATIONS

The following tables give a complete list of all claims and applications of record in the Department of Water Resources which have not been canceled. This list also includes pending applications which have not yet been approved.

The claims and applications have been arranged in each water division by streams in alphabetical order, and the appropriations on each stream are arranged in order of priority.

Appropriations having docket numbers refer to claims covering rights which were acquired under the law prior to April 4, 1895, and those having application numbers were filed to appropriate water under the law of 1895.

Following these tables is a list of water appropriations which have been canceled in full or in part, or which have been dismissed during the past two years.
