July 2014

**ANNUAL REPORT OF WATER USE ACTIVITIES
IN THE REPUBLICAN BASIN WITHIN TRI-BASIN NRD
TO MEET THE REQUIREMENTS OF THE JOINT INTEGRATED MANAGEMENT PLAN
FOR THE 2014 JOINT INTEGRATED MANAGEMENT PLAN PROGRESS REVIEW MEETING**

I. SUMMARY

The purpose of this report is to convey information that Tri-Basin Natural Resources District (TBNRD) agreed to supply to the State of Nebraska as part of a joint Integrated Management Plan for the Republican River Basin.

Map #1: Basin Reference Map

II. INTRODUCTION

TBNRD encompasses portions of the Republican, Platte and Little Blue River Basins (see map #1, above). The district also contains an area commonly referred to as the “Groundwater Mound,” a large area spanning portions of all three basins that is characterized by groundwater levels that are higher than historic “pre-development” groundwater elevations.

More than 100,000 acres of cropland within the Platte Basin portion of TBNRD are irrigated with water diverted from the Platte River and distributed through the canals of the Central Nebraska Public Power and Irrigation District (CNPPID). Surface irrigation water and the canals that distribute it enhance recharge of groundwater supplies within the district. In addition to helping sustain groundwater supplies, this incidental recharge has increased streamflows in Platte and Republican tributaries.

III. CERTIFIED IRRIGATED ACRES

The district began certifying irrigated acres in the Republican Basin in 2004. The initial certification process in the Republican Basin ended on September 15,

2004. Since that time, corrections and revisions to the certified acre database have occurred with a net result that, as of February 7, 2014, of 189,447.16 certified irrigated acres. Commingled acres are acres that may be watered with groundwater or surface water, often times a combination of both. Data regarding certified irrigated acres can be found in **TABLE 1: Certified Acres**, below. Detailed information about locations and distribution of certified irrigated acres is available in the Tri-Basin NRD office.

TABLE 1: Certified Irrigated Acres					
	Year	Groundwater	CoMingled Acres	Surface Water	
Gosper County	2012	56,489.90	1057.16	173	
	2013	56,501.89	1,013.68	216.48	
Kearney County	2012	40,955.11	427.59		
	2013	40,938.11	427.59		
Phelps County	2012	85,504.59	4,532.56	236.51	
	2013	85,550.50	4,562.40	236.51	
Total	2012	182,949.60	6,017.31	409.51	189,376.42
	2013	182,990.50	6,003.67	452.99	189,447.16

IV. APPROVED CERTIFIED ACRE AND GROUNDWATER TRANSFERS

A. TBNRD allows certified irrigated acres to be transferred from one parcel to another within the Republican Basin portion of the district, with some limitations. Certified irrigated acres also cannot be transferred from parcels with surface water or commingled water resources to parcels that have groundwater wells as their only water source. The NRD also pro-rates certified acre transfers in which acres are transferred from low to high streamflow depletion zones. Between January 1, 2013 and December 31, 2013 the district approved 18 certified irrigated acre transfers in the Republican Basin. A total of 219.73 certified irrigated acres were involved in these transfers. Data regarding the location, amount and conditions associated with each transfer can be found in **TABLE 2A: Republican Basin Transfers-Acres Original Locations** (page 4) and **TABLE 2B: Republican Basin Transfers-Destinations for Transferred Acres** (page 5).

B. TBNRD regulates groundwater pumping off of overlying land by requiring landowners to secure groundwater transfer permits before they can pump groundwater to properties that are not under the same ownership. Groundwater transfer permits can only be used to supply groundwater for irrigation of certified irrigated acres. Landowners are required to install flowmeters on wells that are permitted for transfers and to report pumping from these wells annually to the TBNRD. TBNRD issued 12 groundwater transfer permits in the Republican Basin between January 1, 2013 and December 31, 2013. Data regarding groundwater transfers can be found in **TABLE 3: Groundwater Transfers**, below.

TABLE 3: Groundwater Transfers

V. **WELL CONSTRUCTION PERMITS**

A. Since 1989, TBNRD has required landowners to secure well construction permits before they drill wells capable of pumping more than 50 gallons per minute. The district issues three categories of well permits: new well permits, conditional replacement well permits, and replacement well permits.

TBNRD requires landowners to agree to several conditions on the operation of new wells and conditional replacement wells before permits are issued. These conditions are listed in an agreement that is signed by landowners when they apply for these types of well permits. A copy of that agreement is attached to this report as Appendix A.

B. **TABLE 4: TBNRD Well Permits** (below) is a breakdown of well permits that TBNRD issued in the Republican Basin between January 1, 2013 and December 31, 2013. A detailed listing of well permits issued by TBNRD in 2013 is found in **TABLE 5: Well Permit Summary** (below).

TABLE 4: TBNRD Well Permits	
Well Permit Type	Permits
New (variance) irrigation [Acre transfer involved]	0
Replacement irrigation	11
Conditional replacement irrigation - supplemental to groundwater	9
Dewatering	0
New commercial/industrial	

VI. VARIANCES

TBNRD issues new well permits to landowners of parcels that don't have a prior irrigation history only after they have transferred sufficient certified irrigated acres for the intended new use. The TBNRD Board must approve a variance to the rule prohibiting new well construction before new well permits can be issued. No new well construction permit variances were issued in the Republican Basin between January 1, 2013 and December 31, 2013 (see Table 5, below).

TABLE 5: Well Permit Summary			
Permit Number	Well Permit Type	Legal Description	NDNR Reg. Number
TBSG-1431	SG-Supplemental to Groundwater	Section 35-5-17W	G-170025
TBSG-1435	SG-Supplemental to Groundwater	Section 33-7-21W	G-167778
TBSG-1443	SG-Supplemental to Groundwater	Section 7-5-15W	G-167287

TBSG-1452	SG-Supplemental to Groundwater	Section 28-5-21W	NDY
TBSG-1453	SG-Supplemental to Groundwater	Section 13-6-19W	NDY
TBSG-1456	SG-Supplemental to Groundwater	Section 20-5-21W	NDY
TBSG-1459	SG-Supplemental to Groundwater	Section 16-5-19W	NDY

Tri-Basin NRD corrected the district's certified acre database by certifying 147.4 acres in ten parcels that had a history of irrigation between 1997 and 2005. These acres weren't previously included in the district's database, because they hadn't been classified as irrigated cropland by county assessors. During the October, 2013 NRD Board meeting, the board of directors added a new pre-condition for con-

sideration of irrigated acre corrections. Since that meeting, landowners must prove not only that land was irrigated during the period 1997-2003, but that land was also irrigated during three of the past five years. Tri-Basin NRD's Republican Basin Corrections data is in **TABLE 6: Republican Basin Variances** (below).

Type of Variance	Legal Description	Affected Acres
Variance on transferring rules into Phase II area	SW of SW 1/4 Section 6-5-22	36
New Well Permit	SW 1/4 Section 22-5-22	
Certified Acre Correction Request	W 1/2 of NE 1/4; Lots 4 & 5 Section 31-6-17W	21.67

Certified Acre Correction Request	Whole Section Section 19-6-18W	42.35
Certified Acre Correction Request	Pt of NE 1/4 Section 36-6-18W	6.89

VII. MUNICIPAL AND INDUSTRIAL ACCOUNTING

TBNRD collects water use data annually from all municipalities and industries within the district. Municipal and industrial water use data for communities and industries located in the Republican Basin reported to TBNRD in 2013 are shown in the next two tables. A summary of Municipal Water Use may be found in **TABLE 7: Republican Basin Municipal Water Use Data** (below). **TABLE 8** (page 9) shows Industrial and Commercial Water Use Data.

Municipality	2012	2013
Atlanta	33,219,000	23,124,400
Arapahoe	138,279,000	120,573,000

VIII. FLOWMETER DATA

TBNRD requires flowmeters to be installed and annual water use to be reported to TBNRD whenever landowners drill new wells, receive irrigation-related cost-share funds, or when groundwater is transferred from one property to another. In 2013 landowners reported data from 1,604 metered wells in the Republican Basin. The metered wells reported irrigating 177,989.52 certified irrigated acres. There are 34 wells in the Republican Basin that are exempted from having flowmeters. All District flowmeter data is reported annually to the Department of Natural Resources (DNR) for purposes of Republican River Basin Compact Administration accounting. A summary of Republican Basin water use data is included in this report as Appendix B. Detailed Republican Basin flowmeter data is available from the Tri-Basin NRD office.

IX. WATER BANKING ACTIVITIES

TBNRD is considering establishing a water bank of some sort, but no policy has yet been agreed upon by the TBNRD Board of Directors.

X. RETIRED ACRES AND OTHER STREAMFLOW ACCRETION ACTIVITIES

Tri-Basin NRD paid CNPPID to divert 5400 acre-feet of water from the Platte River into Elwood Reservoir in Gosper County in 2008 and 2906 acre-feet in 2009. These diversions were made from the Platte when streamflows exceeded target flows, or when irrigation deliveries were suspended due to heavy rainfall in the CNP-PID irrigated area. They were above and beyond normal diversions into the reservoir

for irrigation deliveries. According to calculations by DNR staff (TBNRD_offset_summary_update_7_19_10.xls), these diversions should provide 1191 acre-feet of offset credit for the Republican Basin in 2012. TBNRD and DNR paid CNPPID to divert approximately 15,000 acre-feet into Elwood and the E-65 canal during the Fall of 2013. In both instances, these diversions were above and beyond normal diversions into the reservoir.

Irrigated land was temporarily retired in TBNRD during 2013 through 18 contracts totaling 241.6 irrigated acres were signed up for USDA-EQIP Dry Land Corners. Tri-Basin NRD records indicate that 1776.6 irrigated acres are enrolled in USDA Conservation Reserve Enhancement Program (CREP) in the Republican Basin portion of the district. Most of these contracts are set to expire by 2019.

Landowners reported to TBNRD on district water use reports that conservation tillage practices have been adopted or continue to be utilized on 114,477.16 certified irrigated acres in the Republican Basin portion of the district during 2013 (no-till data is available from the Tri-Basin NRD office). Recent university research (Klocke, et al, 2009) indicates that evapotranspiration (ET) is reduced by as much as 3 inches per acre on irrigated cropland, as compared to conventional tillage systems, so if the estimates of no-till acres are accurate, as much as 28,619 acre-feet of water was conserved in the Republican Basin in TBNRD in 2013 through this conservation practice.

XI. GROUNDWATER LEVELS

TBNRD has an extensive network of 109 dedicated groundwater observation wells (42 in the Republican Basin) and 90 irrigation wells (60 in the Republican Basin) that are used to measure groundwater levels (see Map #2, page 11). TBNRD also works cooperatively with CNPPID to gather groundwater level data. Data from 20 wells measured by CNPPID are included in TBNRD's groundwater observation well database. District water level data is reported bi-annually to U.S. Geological Survey and UNL-Conservation and Survey Division. Groundwater level data for the district is available from the Tri-Basin NRD office.

Map #2: Dedicated Groundwater Observation Wells

Tri-Basin NRD – Republican Basin Annual Report
Appendix A

Tri-Basin Natural Resources District
New Well and Conditional Replacement Well Permit
Applicant Certification and Agreement

Applicant Certification and Agreement to be bound by Conditions and Limitations on operation of a Well permitted as a New Well or as a Conditional Replacement Well pursuant to Rule 1.12, Tri-Basin Natural Resources District Rules and Regulations for Management of Land and Water Resources

NRD Permit # _____ Applicant _____

Applicant is the owner of the following- described real estate:

_____ $\frac{1}{4}$ Section T N - R W _____

Applicant accepts and agrees to be bound by the following conditions and limitations on the operation of a well that is constructed under the authority of a permit issued by the Tri-Basin Natural Resources District ("NRD"). The conditions and limitations are (check the box and initial those that apply):

1. Applicant agrees to offset any "new depletions" to streamflows of the Platte River, Little Blue River, Republican River, or their tributaries that may be determined to be associated with use of this well. Applicant agrees to use methods to offset those depletions that are deemed acceptable by the NRD and the State of Nebraska. Applicant understands and agrees that Applicant's failure to offset said new depletions may result in closure of this well or restrictions being imposed by the NRD on the number of acres of land that can be irrigated by this well.

2. Applicant agrees to abide by well spacing and pumping capacity limitations that apply to the well that is the subject of this permit, whether such limitations arise pursuant to federal or state law or by rule or regulation of the NRD. Applicant understands and agrees that Applicant's failure to comply with all rules and regulations of the NRD that pertain to this well may result in closure of this well and civil or criminal prosecution and other penalties.

3. Applicant agrees to comply with all current and future rules and regulations of the NRD that pertain to this well. Applicant understands and agrees that Applicant's failure to comply with all rules of regulations of the NRD that pertain to this well may result in closure of this well and civil or criminal prosecution and other penalties.

4. Applicant agrees to maintain any and all surface water rights associated with the land to be irrigated by this well for the lifespan of the permitted well. Applicant understands and agrees that Applicant's failure to comply with all rules and regulations of the NRD that pertain to this well may result in closure of this well and civil or criminal prosecution and other penalties (conditional replacement wells only).

5. Applicant agrees to irrigate only land that has been certified for irrigation by the NRD (no new irrigated acres will be allowed). Applicant understands and agrees that Applicant's failure to prevent irrigation of land not certified for irrigation by the NRD may result in closure of this well and prosecution by the State of Nebraska (conditional replacement wells only).

Applicant certifies that Applicant is familiar with the information contained in this instrument and that to the best of Applicant's knowledge and belief, such information is true, complete and accurate. Applicant further acknowledges and agrees that the NRD and/or the State of Nebraska may impose additional conditions, limitations and restrictions on operation of the well that is the subject of this permit. Applicant further acknowledges and agrees that the conditions and limitations agreed to herein shall also be binding upon Applicant's successors-in-interest to the well and/or the subject real estate.

Tri-Basin NRD – Republican Basin Annual Report
Appendix A

I certify that I am familiar with the information contained in this application and that to the best of my knowledge and belief such information is true, complete and accurate. I further acknowledge that Tri-Basin Natural Resources District or the State of Nebraska may impose additional conditions, limitations and restrictions on operation of the well that is the subject of this permit.

Certified Acres	189,447.16	298,977.01	91,435.75	579,859.92

Notes: Of the 34 meter exemptions 22 of those wells were not used - 12 Wells reported an estimated use.

Series Wells - We have a total of 123 series wells [where 2 or more wells work together to water the same acres] Several wells in a series do not have a meter as the wells are tied together and the water goes through the same meter. In the Republican basin we have 119 series wells and 2 in each of the Platte and Little Blue basins.

We have 26 contracts, approx 1806.55 acres in the CREP program.

Supplemental Wells - The table on Supplemental wells was produced from well permits that have been permitted for supplemental use. In 2013 many supplemental wells were used as the only water source on a field so that surface water could be transferred.

Staff has completed 518 meter inspections for 2013. Inspections for 2013 will continue into the spring of 2014 for wells where meters had been removed and also meters that had been reported to be not working correctly.
