Notes:

The State Engineer's Office is still holding, unapproved, three irrigation use applications that violate the spacing policy currently in place for the area.

The "MIS" use for Permit No. U.W. 201832 allows water from the well to be used for pipeline construction for a period of two years.

Permit No. U.W. 203396 allows an additional 20 acres to be irrigated using water produced by this well.
